The SAGE Encyclopedia of Contemporary Early Childhood Education Aug 25 2019 The general public often views early childhood education as either simply "babysitting" or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development – physical, cognitive, language, social, emotional, aesthetic – as well as comprehensive review of best educational practices with young children, effective

preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?

What Children Know Jan 11 2021 The subject of these five essays is the literary and visual art of children. The essays explore two propositions: first that children's stories, poems and meditations, their drawings, paintings, and models, may legitimately be described as works of art; and second that to acknowledge the artistic status of children's works revolutionizes the process of education. The book is dedicated to the children and teachers of Lawrence, Massachusetts, where the author has spent a few weeks every year since 2004 as a participant observer in elementary, middle, and high school classrooms. Designed and produced by Julie Bernson.

Cries Unheard Nov 01 2022 England's controversial #1 best-seller. What brings a child to kill another child? In 1968, at age eleven, Mary Bell was tried and convicted of murdering two small boys in Newcastle upon Tyne, England. Gitta Sereny, who covered the sensational trial, never believed the characterization of Bell as the incarnation of evil, the bad seed personified. If we are ever to understand the pressures that lead children to commit serious crimes, Sereny felt, only those children, as adults, can enlighten us. Twenty-seven years after her conviction, Mary Bell agreed to talk to Sereny about her harrowing childhood, her terrible acts, her public trial, and her years of imprisonment—to talk about what was done to her and what she did, who she was and who she became. Nothing Bell says is intended as an excuse for her crimes. But her devastating story forces us to ponder society's responsibility for children at the breaking point, whether in Newcastle, Arkansas, or Oregon. A masterpiece of wisdom and sympathy, Gitta Sereny's wrenching portrait of a girl's damaged childhood and a woman's fight for moral regeneration urgently calls on us to hear the cries of all children at risk.

The best interests of the child Jan 23 2022 What does the concept of the best interests of the child mean in practice? How should it be interpreted and applied? This publication sheds lights on different aspects of this concept. The concept of the best interests of child, as stated in Article 3.1 of the United Nations Convention on the Rights of the Child, has caused many controversies and debates amongst policy makers, experts and practitioners. Although central to a child's full enjoyment of his or her rights, the meaning of the concept in practice and how it should be interpreted and applied, is still part of today's debate. The Belgian Authorities and the Council of Europe organised on 9 and 10 December 2014 a conference on "The best interests of the child - A dialogue between theory and practice" to provide an opportunity for actors involved in decisions that have an impact on children's lives to share knowledge and enhance the understanding of the concept of the child's best interest. Featuring in this publication are the 21 different viewpoints presented during the conference on the concept of the best interests of the child. They are divided into four chapters namely those presenting general reflections of the concept; assessing, determining and monitoring best interests; using the concept in different environments; and understanding the concept in family affairs. All viewpoints agree on the fact that there is no comprehensive definition of the concept, and that its vagueness has resulted in practical difficulties for those trying to apply it. Some suggest that the best interest should therefore only be used when necessary, appropriate and feasible for advancing children's rights, whereas others see the flexibility of the concept as its strong point. Through their different interpretations and analysis, this publication offers a solid contribution to the overall understanding of the concept of the best interests of child, necessary to improving and safeguarding children's rights overall.

Children Forsaken Dec 30 2019 A shocking reminder of the cruel history of childhood that has been largely hidden and forgotten. *Children Forsaken* provides a long, historical, overarching examination of the phenomenon of child abuse. In the UK battered child syndrome was 'discovered' in the 1960s, whilst child sexual abuse gained attention in the early 1980s. Subsequent enquiries, legislation and practice developments have focused narrowly on reacting to events giving the impression that child abuse is a recent problem. Yet the historical record provides a multitude of examples of the ritual slaughter, sexual and physical abuse of children continuing since Ancient times. This book places child abuse in the context of the way children and childhood have been understood throughout the ages, but also show that despite legal definitions, and children's rights laws, children and young people continue to suffer. This book enables practitioners and those training in the helping professions to gain a deeper understanding of how embedded in human society child abuse has been and still is. Practitioners need to perceive child abuse as a long-standing problem about children's status in the World, their legal and human rights, and that much work is still needed to ensure children's needs and safety are paramount. "This ambitious book paints an important and erudite picture of child abuse and social responses to it, bringing us up-to-date with a call for continued vigilance, compassion, and action." Professor Jonathan Parker, Bournemouth University

Transgender Children and Young People Nov 20 2021 This book is a collection of essays about the current theory and practice of transgenering children. Essays are written against the grain of the popularised medical definition of 'the transgender child' as a young person whose 'true' gender lies in the brain, or pre-social 'identity'. Contributors contest this diagnosis from a range of perspectives, including as social theorists, psychotherapists, persons living as transgender, individuals who have de-transitioned, and parents of adolescents identifying as transgender. They argue that medicine, social policy and the law build ideas about 'the transgender child', and contend that it is politics, not science, which accounts for the exponential rise in the number of children diagnosed as transgender by gender identity clinics. They conclude that today's medical and social trend for transgenering children is not liberal and progressive, but politically reactionary, physically and psychologically dangerous and abusive.

Mary, then eleven, was charged and subsequently convicted of the manslaughter of two younger boys. Now, following Mary's release on licence, and in collaboration with her, Sereny provides a thought-provoking biography of someone who was considered to have committed an evil crime of unparalleled horror. A powerfully disturbing book, it will resonate with all who read it.

Mary Flora Bell: The Horrific True Story Behind an Innocent Girl Serial Killer Jun 27 2022 What can drive a young and seemingly innocent child to kill? Murder is horrible enough when perpetrated by adults, and yet the concept takes on a whole new level of chilling morbidity when a murderer is revealed to be a young boy or girl. Is it the result of severe trauma manifesting itself in the most macabre of ways? Is it the progeny of some severe mental disorder? Or were they influenced by the actions of the people they grew up with? Most of the time, the answers to such a question are simple but no less horrific. Eleven-year-old Mary Flora Bell was tried and found guilty, in 1968, for the coldhearted murders of two very young boys - crimes which she committed without any hint of remorse. After her past and motives have been examined, hindsight asks the pressing question: Had Mary being a victim herself turned her into a killer? In this brand new expanded edition, the author sets out to discover what really happened to turn young Mary into an infamous killer. In addition to the previously printed material, you will find an all-new introduction and chapters filled with the author's never before published in-depth study into what made Mary angry enough to kill and her life after the crimes. From the details of her murders to the dark childhood she suffered, Mary Flora Bell's short, but horrific, time as a child serial killer will be analyzed in detail within Mary Flora Bell: The Horrific True Story Behind An Innocent Girl Serial Killer. Home Will Never Be the Same Again Jul 25 2019 Adult children are often overlooked and forgotten when their parents divorce later in life, but in these pages they will find comfort and understanding for the many feelings, frustrations, and challenges they face. For more than two decades, a silent revolution has been occurring and creating a seismic shift in the American family and families in other countries. It has been unfolding without much comment, and its effects are being felt across three to four generations: more couples are divorcing later in life. Called the “gray divorce revolution,” the cultural phenomenon describes couples who divorce after the age of 50. Overlooked in the issues that affect couples divorcing later in life are the adult children of divorcing parents. Their voices open this book, and they are the voices of men and women, 18 to 50 years old. Some of them are single; some are married. Some have children of their own. All of them are in different stages of shock, fear, and sudden, dramatic change. In *Home Will Never Be the Same: A Guide for Adult Children of Gray Divorce*, Carol Hughes and Bruce Fredenburg share their deep understanding gained during the innumerable hours they have spent with these women and men in their clinical practices. The result is a valuable resource for these too often forgotten adult children, many of whom find that, whenever they express their feelings and experiences, the most important people in their lives frequently ignore and dismiss them. As the divorce rate for older adults soars, so too does the number of adult children who are experiencing parental divorce. Yet, these adult children frequently say that they are the only ones who are aware of what they are going through, no one understands what they are experiencing, and they feel painfully alone.
