Document Image Analysis Jul 18 2021 The book focuses on one of the key issues in document image processing - graphical symbol recognition, which is a sub-field of the larger research domain of pattern recognition. It covers several approaches: statistical, structural and syntactic, and discusses their merits and demerits considering the context. Through comprehensive experiments, it also explores whether these approaches can be combined. The book presents research problems, state-of-the-art methods that convey basic steps as well as prominent techniques, evaluation metrics and protocols, and research standpoints/directions that are associated with it. However, it is not limited to straightforward isolated graphics (visual patterns) recognition; it also addresses complex and composite graphical symbols recognition, which is motivated by real-world industrial problems.

The Neurobiology of C. elegans Aug 31 2022 The Neurobiology of C. elegans assembles together a series of chapters describing the progress researchers have made toward solving some of the major problems in neurobiology with the use of this powerful model organism. The first chapter is an introduction to the anatomy of the C. elegans nervous system. This chapter provides a useful introduction to this system and will help the reader who is less familiar with this system understand the chapters that follow. The next two chapters on learning, conditioning and memory and neuronal specification and differentiation, summarize the current state of the C. elegans field in these two major areas of neurobiology. The remaining chapters describe studies in C. elegans that have provided particularly exciting insights into neurobiology.

Our Friends Beneath the Sands Aug 07 2020 The gripping true story of the French Foreign Legion in the Sahara. Ever since the 1920s the popular legend of the French Foreign Legion has been formed by P.C. Wren's novel BEAU GESTE - a world of remote forts, warrior tribes, and desperate men of all nationalities enlisting under pseudonyms to fight and die under the desert sun. As with all clichés, the reality is far richer and more surprising than this. In this book Martin Windrow describes desert battles and famous last stands in gripping detail - but he also shows exactly what the Foreign Legion were doing in North Africa in the first place. He explains how French colonial methods there actually had their roots in the jungles of Vietnam, and how the political pressures that kept the empire expanding can be traced to battles on the streets of Paris itself. His description of the Berber tribesmen of Morocco also reveals some disturbing modern parallels: the formidable guerrillas of the 1920s were inspired by an Islamic fundamentalist who was adept at using the world's media to further his cause. Martin Windrow's previous book THE LAST VALLEY received fabulous reviews across the English-speaking world. This unique book, which is the first to examine the 'golden age' of the Foreign Legion has followed suit.
