The American Booksellers Guide Aug 31 2022

The WPA Guide to Washington Jul 30 2022 During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. The WPA Guide to Washington exhibits the beauty and individuality found in the Pacific Northwest. The guide takes the reader on a journey across the Evergreen State, from Seattle to Spokane with the Cascades in between. Essays on the state's large lumber industry and its role in the westward expansion are included.

The Green Guide to Low-Impact Hiking and Camping Oct 01 2022 "A classic of backpacking literature" (Backpacker), now updated with a brand-new foreword by environmentalist and best-selling author Bill McKibben Originally published as Backwoods Ethics in 1979, Laura and Guy Waterman's definitive guide to low-impact hiking and camping was a prophetic call to reevaluate the impact of outdoor recreation on the wilderness. Enthusiastically received by environmentalists and wilderness managers at the time, its warnings and advice are now more relevant than ever. With wisdom and gentle humor, Laura and Guy Waterman present a strong case for the importance of respecting the natural world while you're enjoying it. In his foreword to the new edition, world-famous environmentalist Bill McKibben puts the Watermans' advice into context for today's world. Day hikers, campers, and backpackers who follow the sensible techniques laid out in this book will help preserve the wilderness experience for generations to come.

Death on Mount Washington Nov 09 2020 On Mount Washington, it's lack of preparation, not the mountain, that kills. The weather is highly changeable with wind gusts of 140 mph and -35 degree temps. Then there are the avalanches and icefalls. Combine this with inexperienced hikers in t-shirts and flip flops and things can get ugly fast. Death on Mount Washington describes the circumstances behind the tragic tales of those who have lost their lives on the mountain. No one--not even the most experienced mountaineer or pilot--is safe from the mountain's mercurial weather conditions. Learn from the mistakes of others in the comfort and safety of your armchair and remember to respect Mount Washington on your next ski trip.
