*Community-Based Global Learning* Aug 19 2021 International education, service-learning, and community-based global learning programs are robust with potential. They can positively impact communities, grow civil society networks, and have transformative effects for students who become more globally aware and more engaged in global civil society - at home and abroad. Yet such programs are also packed with peril. Clear evidence indicates that poor forms of such programming have negative impacts on vulnerable persons, including medical patients and children, while cementing stereotypes and reinforcing patterns of privilege and exclusion. These dangers can be mitigated, however, through collaborative planning, design, and evaluation that advances mutually beneficial community partnerships, critically reflective practice, thoughtful facilitation, and creative use of resources. Drawing on research and insights from several academic disciplines and community partner perspectives, along with the authors' decades of applied, community-based development and education experience, they present a model of community-based global learning that clearly espouses an equitable balance between learning methodology and a community development philosophy. Emphasizing the key drivers of community-driven learning and service,

cultural humility and exchange, seeking global citizenship, continuous and diverse forms of critically reflective practice, and ongoing attention to power and privilege, this book constitutes a guide to course or program design that takes into account the unpredictable and dynamic character of domestic and international community-based global learning experiences, the varying characteristics of destination communities, and a framework through which to integrate any discipline or collaborative project. Readers will appreciate the numerous toolboxes and reflective exercises to help them think through the creation of independent programming or courses that support targeted learning and community-driven development. The book ultimately moves beyond course and program design to explore how to integrate these objectives and values in the wider curriculum and throughout formal and informal community-based learning partnerships.

*The Music Professor Online* Nov 21 2021 A practical book that provides a window into online music instruction in higher education.

*Boundaries of Adult Learning* Mar 26 2022 Until relatively recently, adult learning in the UK was largely recognised as being situated mainly within the LEA adult education centre, university extra-mural departments and the WEA. However, this picture has changed. The major change has been a shift from 'education' to 'learning' as the key organising concept. A greater range of settings are now recognised as sites producing learning, and alongside this has grown a debate about the purpose and form of study within adult learning. This has led people to question both the concept of adult learning and the boundaries of its provision. This book reviews and assesses the changes which are taking place. It explores the disputes surrounding adult learning, discussing how boundaries have blurred thereby creating new opportunities such as APL and credit transfer, and including a significantly wider range of activities within the definition of learning. It also assesses the extent to which, despite the changes in boundaries, inequalities in learning opportunities still persist.

The Course Reflection Project Oct 21 2021 Service-learning is entering a post-initiatory phase. At tertiary institutions of all types and sizes, service-learning programs are common and service-learning requirements for graduation are growing in popularity. Taken together -- alongside continued faculty interest in effective teaching -- these factors have raised the visibility and popularity of service-learning. Now the greater need in service-learning is not to prove the need for, or efficacy of, service-learning, but to turn the focus squarely back on practice. Following established best practice is not enough; instructors also need to reflect on how this fits within the specific context and application of each unique course and service-learning partnership. While there are many excellent resources that detail best practice and showcase exemplary service-learning courses, faculty reflection and course revision often goes unmentioned. In response to the lack of attention on the role of reflection and course revision, we convened groups of faculty from a variety of disciplines to reflect deeply on their courses, paying specific attention to obstacles and challenges. These conversations were converted to articles for this edited collection, each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts. This text contributes to the body of literature on service-learning in a unique and practical manner. Faculty teaching or interested in teaching service-learning classes would benefit from this text as well as university administrators and community service directors involved in service-learning at a programmatic and institutional level. This book should be marketed to faculty teaching disciplinary service-learning classes and service-learning pedagogy classes and administrative offices involved in service-learning. This could be a supplementary text for graduate-level pedagogy courses. Higher education institutional libraries would benefit from this text, as well as the national and state campus compact offices.

**Contemporary Leadership and Intercultural Competence** Oct 01 2022 Featuring contributions from some of the world's most renowned cross-cultural management theorists and commentators, this breakthrough text explores the cross-cultural dynamics within organizations. The book examines the evolving role of cultural diversity in the workplace, the application of cultural comprehension to organizations, and the measurement of various aspects of intercultural competence.

*The Feedback Process* Jan 24 2022 Drawing from classroom research, *The Feedback Process* offers teaching methods for commenting on students' drafts—both in written and auditory formats. This book includes writing assignments, rubrics, surveys, and sample student papers with commentary from English and other humanities courses as well as models for writing and audio-taping comments.

*The Framework for Success in Postsecondary Writing* Oct 28 2019 Illustrates the widespread applications of the Framework for Success in Postsecondary Writing, especially the eight habits of mind, in helping students to be successful not only in postsecondary writing courses but also in four arenas of life: academic, professional, civic, and personal.

**Challenges in Language Testing Around the World** Dec 23 2021 This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

*Introduction to Social Work* Dec 31 2019 The award-winning *Introduction to Social Work: An Advocacy-Based Profession* takes students on an exploration of what social work is, what it was historically, and how to be an effective advocate as a social worker moving forward. Built on a unique advocacy practice and policy model comprised of four components—economic and social justice, a supportive environment, human needs and rights, and political access—the book provides a crucial lens for viewing today's social issues. Best-selling authors Lisa E. Cox, Carolyn J. Tice, and Dennis D. Long emphasize advocacy throughout all sectors of social work, with a focus on environmental, international, and military social work. The Third Edition closely aligns with the latest Educational Policy and Accreditation Standards (EPAS) from the Council on Social Work Education (CSWE); references the 2018 Code of Ethics from the National Association of Social Workers (NASW); and includes profound discussions of societal impacts on areas of public health, policy, juvenile justice, race, inequality, social movements, and self-care. This title is accompanied by a complete teaching and learning package.

**Introduction to Rubrics** Feb 22 2022 This new edition retains the appeal, clarity and practicality that made the first so successful, and continues to provide a fundamental introduction to the principles and purposes of rubrics, with guidance on how to construct them, use them to align course content to learning outcomes, and apply them in a wide variety of courses, and to all forms of assignment. Reflecting developments since publication of the first edition, the authors have extended coverage to include: \* Expanded discussion on use of rubrics for grading \* Grading on-line with rubrics \* Wider coverage of rubric types (e.g., holistic, rating scales) \* Rubric construction in student affairs \* Pros and cons of working with "ready-made" rubrics \* Using rubrics to improve your teaching, and for SoTL \* Use of rubrics in program assessment (case study) \* Application of rubrics in the arts, for study abroad, service learning and students' independent learning \* Up-dated literature review

**Becoming a Reflective Practitioner** Jul 30 2022 'Christopher Johns is an internationally recognised pioneer of reflective practice in nursing and health care.' – Nursing Standard *Becoming a Reflective Practitioner* provides a unique insight into reflective practice, exploring the value of using models of reflection, with particular reference to Christopher Johns' own model for structured reflection. Now in its fifth edition, this book has been completely revised and updated to include up-to-date literature and reflective extracts. Contemporary in approach, this definitive text contains a

variety of rich and insightful reflective extracts that support the main issues being raised in each chapter, and challenges practitioners and students to question their own practice. Now with further scenarios and case studies included throughout, these extracts provide the reader with access to the experience of reflective representation helping to explicate the way in which reflective practice can inform the wider notion of professional practice. With an increase in professional registration requiring reflective evidence, this new edition of *Becoming a Reflective Practitioner* is an essential guide to all those using reflection in everyday clinical practice.

**Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation** Aug 26 2019 Universal design for learning (UDL) has been hailed for over a decade as a revolutionary lens that allows campuses to shift their efforts to create inclusive environments. In recent years, UDL has gone beyond the field of disability and been explored with regards to international and indigenous students. There is now a sizable body of literature that details the benefits of implementing UDL in higher education, as well as a number of emerging studies examining the strategic challenges of developing UDL across institutions. There is, however, still a relative paucity of research discussing the transformation of instruction or assessment in concrete terms. Therefore, there is a necessity for research and information on UDL that has already been implemented in classrooms and the practical examples of what this process of transformation looks like. *The Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation* offers practical examples of UDL having successfully been embedded in courses within various disciplines and classroom formats, as well as across the undergraduate and graduate sectors. The chapters provide case studies and concrete examples of what the UDL reflection on practice might look like in specific faculties and departments. While highlighting UDL in areas such as educational technology, student engagement, assignment design, and inclusive education, this book is ideally intended for inservice and preservice teachers, administrators, teacher educators, higher education professors and leaders, practitioners, researchers, academicians, and students interested in the integration of UDL into strategic academic plans.

**Writing Program Architecture** May 04 2020 *Writing Program Architecture* offers an unprecedented abundance of information concerning the significant material, logistical, and rhetorical features of writing programs. Presenting the realities of thirty diverse and award-winning programs, contributors to the volume describe reporting lines, funding sources, jurisdictions, curricula, and other critical programmatic matters and provide insight into their program histories, politics, and philosophies. Each chapter opens with a program snapshot that includes summary demographic and historical information and then addresses the profile of the WPA, program conception, population served, funding, assessment, technology, curriculum, and more. The architecture of the book itself makes comparison across programs and contexts easy, not only

among the programs described in each chapter but also between the program in any given chapter and the reader's own program. An online web companion to the book includes access to the primary documents that have been of major importance to the development or sustainability of the program, described in a "Primary Document" section of each chapter. The metaphor of architecture allows us to imagine the constituent parts of a writing program as its foundation, beams, posts, scaffolding—the institutional structures that, alongside its people, anchor a program to the ground and keep it standing. The most extensive resource on program structure available to the field, *Writing Program Architecture* illuminates structural choices made by leaders of exemplary programs around the United States and provides an authoritative source of standard practice that a WPA might use to articulate programmatic choices to higher administration. **Service-Learning in the Computer and Information Sciences** May 28 2022 Offering a truly global perspective, this book serves as a road map for service-learning partnerships between information science and nonprofit organizations. It introduces for the first time an essential framework for service learning in CIS, addressing both the challenges and opportunities of this approach for all stakeholders involved: faculty, students, and community nonprofit organizations (NPOs), both domestic and abroad. This volume outlines numerous examples of successful programs from around the world, presenting practical working models for implementing joint projects between NPOs and academia.

*Blended Learning* Jun 24 2019 This is a practical introduction to blended learning, presenting examples of implementation across a broad spectrum of disciplines. For faculty unfamiliar with this mode of teaching, it illustrates how to address the core challenge of blended learning—to link the activities in each medium so that they reinforce each other to create a single, unified, course—and offers models they can adapt. Francine Glazer and the contributors to this book describe how they integrate a wide range of pedagogical approaches in their blended courses, use groups to build learning communities, and make the online environment attractive to students. They illustrate under

what circumstances particular tasks and activities work best online or face-to-face, and when to incorporate synchronous and asynchronous interactions. They introduce the concept of layering the content of courses to appropriately sequence material for beginning and experienced learners, and to ensure that students see both the online and the face-to-face components as being equal in value and devote equal effort to both modalities. The underlying theme of this book is encouraging students to develop the skills to continue learning throughout their lives. By allowing students to take more time and reflect on the course content, blended learning can promote more student engagement and, consequently, deeper learning. It appeals to today's digital natives who are accustomed to using technology to find and share information, communicate, and collaborate, and also enables non-traditional students to juggle their commitments more efficiently and successfully.

[Research Anthology on Instilling Social Justice in the Classroom](#) Dec 11 2020 The issue of social justice has been brought to the forefront of society within recent years, and educational institutions have become an integral part of this critical conversation. Classroom settings are expected to take part in the promotion of inclusive practices and the development of culturally proficient environments that provide equal and effective education for all students regardless of race, gender, socio-economic status, and disability, as well as from all walks of life. The scope of these practices finds itself rooted in curriculum, teacher preparation, teaching practices, and pedagogy in all educational environments. Diversity within school administrations, teachers, and students has led to

the need for socially just practices to become the norm for the progression and advancement of education worldwide. In a modern society that is fighting for the equal treatment of all individuals, the classroom must be a topic of discussion as it stands as a root of the problem and can be a major step in the right direction moving forward. *Research Anthology on Instilling Social Justice in the Classroom* is a comprehensive reference source that provides an overview of social justice and its role in education ranging from concepts and theories for inclusivity, tools, and technologies for teaching diverse students, and the implications of having culturally competent and diverse classrooms. The chapters dive deeper into the curriculum choices, teaching theories, and student experience as teachers strive to instill social justice learning methods within their classrooms. These topics span a wide range of subjects from STEM to language arts, and within all types of climates: PK-12, higher education, online or in-person instruction, and classrooms across the globe. This book is ideal for in-service and preservice teachers, administrators, social justice researchers, practitioners, stakeholders, researchers, academicians, and students interested in how social justice is currently being implemented in all aspects of education.

**Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom** Mar 14 2021 The evaluation of student performance and knowledge is a critical element of an educator's job as well as an essential step in the learning process for students. The quality and effectiveness of the evaluations given by educators are impacted by their ability to create and use reliable and valuable evaluations to facilitate and communicate student learning. The *Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom* is an essential reference source that discusses effective language assessment and educator roles in evaluation design. Featuring research on topics such as course learning outcomes, learning analytics, and teacher collaboration, this book is ideally designed for educators, administrative officials, linguists, academicians, researchers, and education students seeking coverage on an educator's role in evaluation design and analyses of evaluation methods and outcomes.

**Intermediality** May 16 2021 With the ever-growing proliferation of electronic and other popular media, the complexity of relationship between what students see and hear, what they believe and how they interact with one another underscores now, more than ever, the need for across-the-curriculum teaching of critical thinking, critical reading, and critical viewing skills. The emerging consensus is that teaching critical viewing skills bolsters students' abilities in traditional disciplines, combats problems of youth apathy, violence, and substance abuse, and improves students', parents, and teachers' attitudes toward school. *Intermediality: Teachers' Handbook of Critical Media Literacy* challenges the practice of teaching the classics and the canon of acceptable literary works far removed from students' experiences, with emphasis on learning environment over the presentation of any specific or specified content. The authors, Ladislaus Semali and Ann Watts Pailliotet, present literacy education as "intermedial" in nature; it entails constructing connections among varying conceptions and sign systems. Reading printed texts requires more than simply decoding letters into words or sounds; it involves finding meaning, motive, structure, and affect. The same goes for reading the electronic text. The authors argue for the discourse of literacy to take up a critical stance by examining a whole wide array of texts that form the meaning-making process of the looming information age. *Intermediality* examines, extends, and synthesizes the existing literary definitions, texts, theories, processes, research and contexts. It brings into focus the possibilities of working with media texts to address questions adapted from linguists and literary educators. Thus, in this book, critical media literacy becomes a competency to read, interpret, and understand how meaning is made and derived from print, photographs and other electronic and graphic visuals.

**African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors** Feb 10 2021 The lack of African Americans in leadership roles within the academy creates a real crisis in the leadership pipeline. One of the problems could be that the pathways to leadership for African Americans are less visible. They can see the end result but may be less clear about how to get there. Oftentimes, understanding these pathways to leadership is less academic in nature and more informal and/or relational. Thus, the relationship between leadership and

mentorship for African Americans is especially important to advancing in the academy. Further guidance and understanding of steps to advancement from established African American leaders in the academy is therefore needed. *African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors* provides an exhaustive exploration of leadership and mentorship through purpose, preparation, and preceptors. This edited book explains how to identify ways that individuals can strengthen their career trajectory, determine strategies to employ for career advancement, establish lasting and impactful connections with key stakeholders per career aspirations, provide guidance for individuals seeking advancement within the academy, and explore current theoretical and practical nuances with regard to research, literature, and application of leadership and mentorship of African Americans in the academy. Covering topics such as cross-racial mentorship, emotionally intelligent leadership, and African American leaders, this text is ideal for teachers, faculty, university administrators, leaders in education, aspiring future leaders, researchers, academicians, and students.

**Conversations in E-learning** Mar 02 2020 *Conversations in E-Learning* covers everything from e-mail to creating and managing an online community. This book is a useful resource for anyone at any stage of the e-learning process.

*Handbook of Research on Service-Learning Initiatives in Teacher Education Programs* Nov 09 2020 Teacher education programs serve traditional and non-traditional students and develop teachers to enter a range of teaching environments. Approaching teacher education through community involvement and learning objectives helps to effectively prepare teachers to serve local and community needs. The *Handbook of Research on Service-Learning Initiatives in Teacher Education Programs* provides emerging research on the methods and techniques for educators to strengthen their knowledge regarding the intersection of service learning and field placements. While highlighting topics, such as cultural competency, teacher development, and multicultural education, this book explores the benefits, challenges, and opportunities for employing community service as the driving framework for field experiences. This publication is a vital resource for practitioners, educators, faculty, and administrators seeking current research on the opportunity of field involvement to enhance teacher candidates' experiences and provide a channel for meaningful learning.
