The Mystery of Skara Brae Aug 01 2022 An investigation of the origins of the Neolithic farming village on Orkney Island • Reveals the striking similarities between Skara Brae and the traditions of pre-dynastic ancient Egypt as preserved by the Dogon people of Mali • Explains how megalithic stone sites near Skara Brae conform to Dogon cosmology • Examines the similarities between Skara Brae and Gobekli Tepe and how Skara Brae may have been a secondary center of learning for the ancient world In 3200 BC, Orkney Island off the coast of Northern Scotland was home to a small farming village called Skara Brae. For reasons unknown, after nearly six centuries of continuous habitation, the village was abandoned around 2600 BC and its stone structures covered over--perhaps deliberately, like the structures at Gobekli Tepe. Although now well-excavated, very little is known about the peaceful people who lived at Skara Brae or their origins. Who were they and where did they go? Drawing on his in-depth knowledge of the connections between the cosmology and linguistics of Egyptian, Dogon, Chinese, and Vedic traditions, Laird Scranton reveals the striking similarities between Skara Brae and the Dogon of Mali, who still practice the same cosmology and traditions they once shared with pre-dynastic Egypt. He shows how the earliest Skara Brae houses match the typical Dogon stone house as well as Schwaller de Lubicz's interpretation of the Egyptian Temple of Man at Luxor. He explains how megalithic stone sites near Skara Brae conform to Dogon cosmology, each representing sequential stages of creation as described by Dogon priests, and he details how the houses at Skara Brae also represent a concept of creation. Citing a linguistic phenomenon known as "ultraconserved words," the author compares words of the Faroese language at Skara Brae, a language with no known origin, with important cosmological words from Dogon and ancient Egyptian traditions, finding obvious connections and similarities. Scranton shows how the cultivated field alongside the village of Skara Brae corresponds to the "heavenly field" symbolism pervasive throughout many ancient cultures, such as the Field of Reeds of the ancient Egyptians and the Elysian Fields of ancient Greece. He demonstrates how Greek and Egyptian geographic descriptions of these fields are a consistent match with Orkney Island. Examining the similarities between Skara Brae and Gobekli Tepe, Scranton reveals that Skara Brae may have been a secondary center of initiation and civilizing knowledge, a long-lost Egyptian mystery school set up millennia after Gobekli Tepe was ritually buried, and given the timing of the site, is possibly the source of the first pharaohs and priests of ancient Egypt.

Hangman's Brae Sep 02 2022 Hangman's Brae is a vividly written account of the blood-curdling crimes and brutal forms of punishment of north-east Scotland. The book explores the area's underworld and features the grave-robbers, jail-breakers, rioters and other lawbreakers whose crimes led them to premature deaths at the end of a rope or at the not so delicate hands of The Maiden, a gruesome decapitating device predating the French guillotine. The stories of the men who enforced the law and meted out sentences to the ne'er-do-wells who broke it can be just as interesting and memorable as those of the criminals and Norman Adams introduces the reader to some of them. Here you'll find some real characters such as the Aberdeenshire sheriff and criminal officer who always got his man - once spending two chilling nights chained to a brutal murderer and rapist. And it wasn't just hangings that these men had to perform - their grisly work also involved execution by beheading and drowning, often with some witch-burning for good measure. The many true-crime cases in this book shed new light on just how violent and bloody the north-east of Scotland's past was.
