Feminist Interrogations of Women's Head Hair Oct 23 2021 Feminist scholarship has looked extensively at the perception of the body as a flexible construction of cultural and social dictates, but head hair has been often overlooked. *Feminist Interrogations of Women's Head Hair* brings new focus to this underrepresented topic through its intersections with contemporary socio-cultural contexts. Scholars from a wide range of disciplines investigate private and public meanings associated with female head hair, problematising our assumptions about its role and implications in the 21st Century. Readers are invited to reflect on the use of hair in popular culture, such as children's television and pop album artwork, as well as in work by women artists. Studies examine the lived experiences of women from a range of backgrounds and histories, including curly-haired women in Israel, African American women, and lesbians in France. Other essays interrogate the connotations of women's head hair in relation to body image, religion, and aging. *Feminist Interrogations of Women's Head Hair* brings together cultural discourses and the lived experiences of women, across time and place, to reveal the complex and ever-evolving significance of hair. It is an important contribution to the critical feminist thought in cultural studies, fashion studies, media studies, African American studies, queer theory, gerontology, psychology, and sociology.

Going Gray Oct 03 2022 When 49-year-old Anne Kreamer saw a horrifying photo of her harshly dyed brown hair, she realized she wasn't kidding anyone. So she set out a plan: over the next few months she would give up her weekly visits to the salon and let her hair go its natural way. The result is *Going Gray*: an exploration of that experience and a frank, funny, and unflinchingly wise investigation of aging today. Through interviews, experiments, and surprising personal accounts, Kreamer probes the issues behind two of the biggest fears mature women face: Can I be sexually attractive as a gray-haired middle-aged woman? and Will I be discriminated against in the work world? In searching for the balance between attractiveness and authenticity, Kreamer offers an entertaining and valuable look at the politics and personal costs of our definition of "aging gracefully."

Rethinking Retirement Sep 29 2019 John Piper challenges fellow baby boomers to forego the American dream of retirement and live out their golden years with a far greater purpose in mind. They say it's a person's reward for all those years of labor. "Turn in your time card and trade in your IRAs. Let travel plans and golf-course leisure lead the way." But is retirement really the ideal? Or is it a series of poor options that ignore a greater purpose--and will kill a person more quickly than old age? John Piper responds: "Lord, spare me this curse!" And his resounding message is for anyone who believes there's far more to the golden years than accumulating comforts. It's for readers who long to finish better than they started, persevere for the right reasons (and without fear), experience true security, value what lies beyond their cravings, and live dangerously for the One who gave his life in his prime. With this brief book, Piper is sure to spur fellow baby boomers in their resolve to invest themselves in the sacrifices of love--and to grow old with godly zeal.

Aging Hair Feb 24 2022 "Aged? But he does not appear aged, just look, his hair has remained young!" Marcel Proust, In Search of Lost Time (1913–27) The appearance of hair plays an important role in peoples' overall physical appearance and self-perception. With today's increasing life-expectation, the desire to look youthful plays a bigger role than ever. The hair care industry has become aware of this, and capable to deliver active products that are directed toward meeting this consumer demand. The discovery of pharmacological targets and the development of safe and effective drugs such as minoxidil and finasteride also indicate strategies of the drug industry for maintenance of healthy and beautiful hair in the young and old. The study of hair aging focuses on two main streams of interest: On the one hand, the esthetic problem of aging hair and its management, in other words everything that happens outside the skin; on the other hand, the biological problem of aging hair, in terms of microscopic, biochemical, and molecular changes, in other words the "secret life" of the hair follicle in the depth of the skin. Hair aging comprises hair shaft aging, and aging of the hair follicle. The former involves weathering and photoaging of the hair shaft, while the latter manifests as decrease of melanocyte function (graying) and decrease in hair production (alopecia).
