Professional Development That Sticks Mar 02 2020 How can we approach professional development in a thoughtful way, keep teachers motivated, and make the process worthwhile? It's a truth that school leaders can't deny: teachers tend to think of PD as a distraction from the "real work" of the classroom—as something to get through instead of an opportunity to engage, learn, and grow as professionals. Too often, they're absolutely right. When PD is packaged as a one-size-fits-all, one-and-done experience, even content that teachers might greet with enthusiasm won't stay with them for long. It just doesn't stick. In Professional Development That Sticks, Fred Ende makes the case for a better approach—one that melds traditional PD structures with personalized learning. Here, school leaders will find a framework for developing professional learning experiences that spark and maintain teacher motivation and lead to real changes in practice. Ende's three-stage professional development for learning (PDL) process covers critical aspects of planning, providing, and following up. In addition, PDL's Think, Act, and Reflect method ensures your teachers will acquire meaningful, deep, "sticky" learning that lasts.

 The Power of People Skills Nov 09 2020 "The Power of People Skills is the eye-opening, invaluable, definitive guide to achieving success in your organization. Excellent!" —Marshall Goldsmith People are the problem. They're always the problem. Every leader can and must develop this most important of all management skills. In this powerful book, you will learn how to: Make the people decisions that can double your results, relieve your stress, and cause team morale to soar. Attract and retain the very best talent. Deal with difficult people problems in an objective and kind way. Overcome the reluctance we all share to confront under performers. Permanently solve the problems causing most of your stress.

 Leaders Develop First Mar 14 2021 Primer for people leaders, coaches, mentors, and consultants that strive to help others reach their full potential and achieve their career objectives.For leaders, coaches, mentors, and consultants that want to help their employees, mentees, and clients create professional individual development plan, but do not know how.For us with a passion of helping others reach their full potential and achieve their career objectives.Foreword by Dr. Bevalee Vitali, Director of Institute for Leadership Development at Christian Brothers UniversityAs the Director of a graduate program in Executive Leadership at a prestigious university, I have met many emerging leaders over the years. From our first encounter, Jasmin stood out as a leader among leaders. Even in that first meeting, I immediately recognized the contagious positive energy Jasmin brought into the room,

his passion for serving others, and his unquenchable thirst for developing himself and those around him.Jasmin's dedication to constantly becoming a better version of the leader he was born to be has not lessened since our first meeting over a decade ago. In fact, with the publication of now his second book on career growth and individual development, Jasmin has become an expert his field, a gifted leader, a coach, a speaker, and a proficient writer. Reflecting on the first time I met Jasmin, I am not at all surprised by this enormous success.Jasmin's first book, devoted to EXECUTABLE individual developmental plans (IDP), addressed an important aspect of employee empowerment and engagement. His process for articulating an IDP through a disciplined, logical approach highlighted how execution of such plans can enhance career advancement while assisting employees with growth in their current role. The approach Jasmin outlined for achieving success, however YOU define it, through an EXECUTABLE IDP was path-breaking in its powerfulness and simplicity.So impressed was I with his first book, I invited Jasmin to serve as an expert presenter at an emerging leaders program we held at my university. Over a year later, I still receive comments from attendees about their developmental plans and the impact Jasmin's tools have had on their career, professional success, and job engagement.Now, Jasmin takes the idea of professional growth and development to a new audience- leaders. In Leaders Develop First, Jasmin outlines a methodical, step-by-step approach to coaching, mentoring, and developing others. He writes beautifully and passionately about what many leaders forget - leadership is all about the development of others.Similar to his first book, Leaders Develop First outlines a specific, detailed process for guiding others to find career success, life fulfillment, and thus, become the best versions of themselves. Leaders will find Jasmin's approach logical and easy to follow. Once practiced, the steps Jasmin outlines will become intuitive, making his model a powerful way to impact those around you in a positive and lasting way. As a coach, consultant and educator in the field of leadership development, I can say without reservation, this book is greatly needed in the field. It will become a go-to guide and a must read for anyone who leads, coaches, or mentors others.

Enhancing Professional Development for Teachers Jun 28 2022 Teachers, like other professionals, need to stay informed about new knowledge and technologies. Yet many express dissatisfaction with the professional development opportunities made available to them in schools and insist that the most effective development programs they have experienced have been self-initiated. Enhancing Professional Development for Teachers explores how the provision of professional development through online media has had a significant influence on the professional lives of an increasing number of teachers. Growing numbers of educators contend that online teacher professional development (OTPD) has the potential to enhance and even transform teachers' effectiveness in their classrooms and over the course of their careers. They also acknowledge that it raises many challenging questions regarding costs, equity, access to technology, quality of materials, and other issues. Enhancing Professional Development for Teachers suggests that teachers be active participants in planning and implementation of any new technologies that enhance professional development. The book recommends that federal and state policy makers take on the responsibility of promoting equal access to technology while the federal government and foundations play an important role by supporting the development, evaluation, and revision of OTPD.

Deep Work May 04 2020 Read the Wall Street Journal Bestseller for "cultivating intense focus" for fast, powerful performance results for achieving success and true meaning in one's professional life (Adam Grant, author of Give and Take). Deep work is the ability to focus without distraction on a cognitively demanding task. It's a skill that allows you to quickly master complicated

information and produce better results in less time. Deep Work will make you better at what you do and provide the sense of true fulfillment that comes from craftsmanship. In short, deep work is like a super power in our increasingly competitive twenty-first century economy. And yet, most people have lost the ability to go deep-spending their days instead in a frantic blur of e-mail and social media, not even realizing there's a better way. In Deep Work, author and professor Cal Newport flips the narrative on impact in a connected age. Instead of arguing distraction is bad, he instead celebrates the power of its opposite. Dividing this book into two parts, he first makes the case that in almost any profession, cultivating a deep work ethic will produce massive benefits. He then presents a rigorous training regimen, presented as a series of four "rules," for transforming your mind and habits to support this skill. 1. Work Deeply 2. Embrace Boredom 3. Quit Social Media 4. Drain the Shallows A mix of cultural criticism and actionable advice, Deep Work takes the reader on a journey through memorable stories-from Carl Jung building a stone tower in the woods to focus his mind, to a social media pioneer buying a round-trip business class ticket to Tokyo to write a book free from distraction in the air-and no-nonsense advice, such as the claim that most serious professionals should quit social media and that you should practice being bored. Deep Work is an indispensable guide to anyone seeking focused success in a distracted world. In term of scope this report is broader in context as it includes the application and utilization of certain frameworks and model which we read and learnt in Business Communication module 2. This report consists of two main sections (Findings & Conclusion). In the finding phase, I applied the SOAR model for the purpose of career development. This SOAR framework has four aspects which are: Self awareness, Opportunities, Aspirations and Results. In the first factor (Self-Awareness) I applied another model called MAP (Motivation, Ability and Personality) and found that the career progression is my prominent motivating factor and also concluded that the learning style which looks most attracting for myself is Diverger. And at last I also determined that the personality type characteristics which carried is Harmoniser. In the opportunity phase, I sorted out that in the short run, the most feasible option for myself is to engage in UK retail sector through the temporary or part time job and while in the long run, It would most attracting thing for me is to get employment in the Libyan Government sector as my preference is Job security when it comes to evaluate and analysis any job position. So it means that my aspiration is get employed by Government and then to progression in the specified department or area. Then in the Result phase, I demonstrates the result by mentioned that I have crafted my CV and Cover Letter in relation to the Aspirations I outlined in the previous part. After the SOAR model, I used and harnessed some more models to explore and elaborate self-relisation in depth. Through the use of Johari Window Test on Internet, I discovered certain new things about myself that my blind spot characteristics are intelligent, mature, extrovert and caring. And while the open Area traits are Trustworthy and Confident. Through undergoing Cash-flow Quadrant model, I determined that as job security is my prominent approach in evaluating the given job, so I want to engage myself in Employee Quadrant in short-run as well as in long-run. At the very end, I used Covey's 7 Habits theory and preferred to adopt first three habits as it will be enough to me to have to do the government job.  Planning and Organizing Personal and Professional Development Oct 01 2022 Chris Sangster's book is a practical, step-by-step guide to personal and professional development that covers the strategy, techniques and philosophy behind the process. Lifelong learning, the shift from trainer-centred delivery to learner-centred development and the opportunities provided by new technologies, place considerable onus on individuals to take responsibility for their own learning. This guide will help trainers and facilitators to enable learners to do just that. There are, at least, three different participants involved in any meaningful and sustainable process of personal development at work - the learner, his or her line manager and mentor(s), and the training (or development support) function. Chris Sangster provides a route map for each of these three roles. He offers a simple, compelling triangular model to illustrate the interaction of each and places particular emphasis on 'learning outcomes' - as opposed to inputs, focusing attention and objective measurement on learning that manifests itself through application, achievement and changes in behaviour. Whether you are looking for a complete and holistic process for developing your people or a highly readable guide to unravelling the myths of development - such as the confusion between personal and professional development - this book has it all.

It shows how positive lessons can be learnt from these experiences to improve health and healthcare. The contributors offer practical advice based on their extensive and broad experience on how to regain trust between patient and practitioner following these difficulties. They demonstrate how doctors and other healthcare professionals can introduce ways to reduce error and mistrust and describe how to work better with press the public and patients. It is essential reading for all healthcare professionals policy makers shapers and commentators and those representing patient groups. 'The context of this volume is clear - the Bristol paediatric cardiac surgery debacle the Alder Hey scandal around retention and use of dead children's organs without consent and the Harold Shipman murders largely of elderly women in their own homes by their own GP. No surprise then that a first analysis suggests a breakdown of trust. But what the various authors argue for in this volume is both a more careful commentary and a series of complex responses. Real change is gradual a response to a narrative rather than to a single shock to the system. Professional leadership cross-disciplinary working with patients and the public is what will rebuild trust trust based on honesty on listening and on a strong sense of shared values. But it is possible and desirable. The authors have hit on what is 'essentially the 'way through this'!' Julia Neuberger in the Foreword

State of The Global Workplace Oct 21 2021 Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons — but resistance to rapid change is a big one, Gallup's research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.

Redesigning Continuing Education in the Health Professions Aug 19 2021 Today in the United States, the professional health workforce is not consistently prepared to provide high quality health care and assure patient safety, even as the nation spends more per capita on health care than any other country. The absence of a comprehensive and well-integrated system of continuing education (CE) in the health professions is an important contributing factor to knowledge and performance deficiencies at the individual and system levels. To be most effective, health professionals at every stage of their careers must continue learning about advances in research and treatment in their fields (and related fields) in order to obtain and maintain up-to-date knowledge and skills in caring for their patients. Many health professionals regularly undertake a variety of efforts to stay up to date, but on a larger scale, the nation's approach to CE for health professionals fails to support the professions in their efforts to achieve and maintain proficiency. Redesigning Continuing Education in the Health Professions illustrates a vision for a better system through a comprehensive approach of continuing professional development, and posits a framework upon which to develop a new, more effective system. The book also offers principles to guide the creation of a national continuing education institute.
