**Environmental Policy** May 15 2021 Authoritative and trusted, Environmental Policy once again brings together top scholars to evaluate the changes and continuities in American environmental policy since the late 1960s and their implications for the twenty-first century. You will learn to decipher the underlying trends, institutional constraints, and policy dilemmas that shape today's environmental politics. The Tenth Edition examines how policy has changed within federal institutions and state and local governments, as well as how environmental governance affects private sector policies and practices. The book provides in-depth examinations of public policy dilemmas including fracking, food production, urban sustainability, and the viability of using market solutions to address policy challenges. Students will also develop a deeper understanding of global issues such as climate change governance, the implications of the Paris Agreement, and the role of environmental policy in the developing world. Students walk away with a measured yet hopeful evaluation of the future challenges policymakers will confront as the American environmental movement continues to affect the political process.

**Ghost industries** Aug 30 2022 What is the role of water in the conversion of former industrial areas? How is water used in engaging the public to experience these sites both as physical and cultural places? Can ecological design foster the coexistence of industry and environment? The book addresses these core questions by examining the impact of the former Oregonian industry (1830-1940) on the Willamette River landscape and discussing how projects of transformation interpret the triangular interplay among industry, landscape and water. This book is a source of suggestions and ideas for scholars, students and professionals in architecture, landscape architecture, planning and their related fields who want to manage the urban landscapes successfully.

**The President Who Would Not Be King** Feb 09 2021 Vital perspectives for the divided Trump era on what the Constitution's framers intended when they defined the extent—and limits—of presidential power. One of the most vexing questions for the framers of the Constitution was how to create a vigorous and independent executive without making him king. In today's divided public square, presidential power has never been more contested. The President Who Would Not Be King cuts through the partisan rancor to reveal what the Constitution really tells us about the powers of the president. Michael McConnell provides a comprehensive account of the drafting of presidential powers. Because the framers met behind closed doors and left no records of their deliberations, close attention must be given to their successive drafts. McConnell shows how the framers worked from a mental list of the powers of the British monarch, and consciously decided which powers to strip from the presidency to avoid tyranny. He examines each of these powers in turn, explaining how they were understood at the time of the founding, and goes on to provide a framework for evaluating separation of powers claims, distinguishing between powers that are subject to congressional control and those in which the president has full discretion. Based on the Tanner Lectures at Princeton University, The President Who Would Not Be King restores the original vision of the framers, showing how the Constitution restrains the excesses of an imperial presidency while empowering the executive to govern effectively.

**Regional Economic Outlook, May 2014, Western Hemisphere** Oct 08 2020 The five Regional Economic Outlooks published biannually by the IMF cover Asia and Pacific, Europe, the Middle East and Central Asia, Sub-Saharan Africa, and the Western Hemisphere. In each volume, recent economic developments and prospects for the region are discussed as a whole, as well as for specific countries. The reports include key data for countries in the region. Each report focuses on policy developments that have affected economic performance in the region, and discusses key challenges faced by policymakers. The near-term outlook, key risks, and their related policy challenges are analyzed throughout the reports, and current issues are explored, such as when and how to withdraw public interventions in financial systems globally while maintaining a still-fragile economic recovery. These indispensable surveys are the product of comprehensive intradepartmental reviews of economic developments that draw primarily on information the IMF staff gathers through consultation with member countries.

*South Asian Film* [Scapes](#) Jun 27 2022 In South Asia massive anticolonial movements in the twentieth century created nation-states and reset national borders, forming the basis for emerging film cultures. Following the upheaval of the partition of India and Pakistan in 1947 and the Bangladesh Liberation War of 1971, new national cinemas promoted and reinforced prevailing hierarchies of identity and belonging. At the same time, industrial and independent cinemas contributed to remarkably porous and hybrid film cultures, reflecting the intertwining of South Asian histories and their reciprocal cultural influences. This cross-fertilization within South Asian cultural production continues today. *South Asian Film* Scapes excavates these complex politics and poetics of bordered identity and crossings through selected histories of cinema in South Asia. Several essays reveal ways in which fixed notions of national identity have been destabilized by the cross-border mobility of filmed arts and practitioners, while others interrogate how filmic politics intersects with discourses of nationalism, sexuality and gender, religion, and language. Together, they offer a fluid approach to the multiple histories and encounters that conjure "South Asia" as a geographic and political entity in the region and globally through a cinematic imagination.

**Ethical Issues in Aviation** May 03 2020 The aviation industry is unique in two major ways: firstly, it has a long history of government involvement dating back to the early days of aviation; and secondly, its primary concern is the safety of its passengers and crew. These features highlight the importance of ethical decision-making at all levels of the industry. However, well-publicized problems such as the disappearance of Malaysia Airlines Flight 370 highlight the need for ethics to take a more prominent role in the field. *Ethical Issues in Aviation* focuses on both past and current topics in aviation, providing the reader with an overview of the major themes in aviation ethics that cover a broad range of subjects. Contributors include academics who do research in the field as well as professionals who provide first-hand accounts of the ethical situations that arise in the aviation industry. This second edition has been thoroughly revised throughout to bring it up to date, and features several new chapters that cover recent events and topics. This book enhances student learning by providing faculty, students, and those interested in aviation with discussion of the most pressing ethical issues that continue to impact the industry.

**The Collapse of North Korea** Jul 29 2022 This book highlights the increasing risk of North Korea's collapse and considers the necessary actions that would enable the neighboring powers to prepare for such an event. North Korea's deteriorating economic conditions, its reliance on external assistance, and the degree of information penetration all provide hints of its collapse. Whether the chance is high or low, the collapse of North Korea and subsequent Korean unification would drastically alter the geostrategic landscape and profoundly affect the national interests of the regional powers—South Korea, China, the United States, Japan, and Russia. The most desirable scenario for a post-unification Korean Peninsula is a successfully developed and integrated non-nuclear Korea acting as a responsible regional and world stakeholder. This work considers the major challenges expected after a North Korean collapse, including the control of nuclear weapons, disorder in the immediate aftermath of collapse, and economic and social integration. The author then outlines how regional powers need to prepare to handle these challenges in order to minimize suffering and to set the foundation for long-term development and regional stability.

**Cities in Crisis** Nov 08 2020 In recent years, European societies and territories have witnessed the spatial impacts of a severe financial and socio-economic crisis. This book builds on the current debate concerning how cities and urban regions and their citizens deal with the consequences of the recent financial and socio-economic crisis. *Cities in Crisis* examines the political and administrative implications of austerity measures applied in southern European cities. These include cuts in local public spending and the processes of privatization of local public assets, as well as issues related to the re-scaling, recentralization or decentralization of competencies. Attention is paid to the rise of new 'austerity regimes', the question of their legitimacy and their spatial manifestations, and in particular to the social consequences of austerity. The contributions to this book lay the foundation for recommendations on how to improve and consolidate qualified governance arrangements in order to better address rapid economic and social changes. Such recommendations are applicable to cities and urban regions both within and outside of Europe. It identifies possible approaches, tools and partnerships to tackle the effects of the crisis and to prepare European cities for future challenges.

[Japan's new security partnerships](#) Nov 28 2019 After decades of solely relying on the United States for its national security needs, over the last decade, Japan has begun to actively develop and deepen its security ties with a growing number of countries and actors in the Asia-Pacific region and Europe, a development that has further intensified under the Shinzo Abe administration. This is the first book that provides a comprehensive analysis of the motives and objectives from both the Japanese and the partner-countries' perspectives, and asks what this might mean for the security architecture in the Asia-Pacific region, and what lessons can be learned for security cooperation more broadly. This book is for those interested in Japan's security policy beyond the US-Japan security alliance, and non-US centred bilateral and multilateral security cooperation. It is an ideal textbook for undergraduate and graduate level courses on regional security cooperation and strategic partnerships, and Japanese foreign and security policy.

**Experiences with Macroprudential Policy—Five Case Studies** Mar 25 2022 This paper presents case studies of macroprudential policy in five jurisdictions (Hong Kong SAR, the Netherlands, New Zealand, Singapore, and Sweden). The case studies describe the institutional framework, its evolution, the use of macroprudential tools, and the circumstances under which the tools have been used. The paper shows how macroprudential policy is conducted under a heterogeneous set of institutional frameworks. In all cases macroprudential tools have been used to address risks in the housing market. In addition, some of them have moved to enhance the resilience of their banks to more general cyclical and structural risks.

[The Impact, Legitimacy and Effectiveness of EU Counter-Terrorism](#) Sep 30 2022 Counter-terrorism law and policy has been prominent and widespread in the years following 9/11, touching on many areas of everyday life from policing and border control to financial transactions and internet governance. The European Union is a major actor in contemporary counter-terrorism, including through its development of counter-terrorism laws for application within the Union. This book undertakes a multi-disciplinary and empirically informed analysis of the impact, legitimacy and effectiveness of EU counter-terrorism. Taking into account legal, societal, operational and democratic perspectives, this collection connects theoretical and practical perspectives to produce an interdisciplinary and multi-stakeholder study of how we might measure and understand the impact, legitimacy and effectiveness of EU counter-terrorism. Bringing together a select group of experts in the field, particular emphasis is placed on understanding the practical experience of implementing and assessing these measures gathered from and with end users, including law-makers, policy-makers, security services, industry partners and civil society. This edited collection will

be of great relevance to scholars and policy makers with an interest in counter-terrorism law, EU law and security studies.

*Opportunistic Spectrum Sharing and White Space Access* Mar 13 2021 Details the paradigms of opportunistic spectrum sharing and white space access as effective means to satisfy increasing demand for high-speed wireless communication and for novel wireless communication applications This book addresses opportunistic spectrum sharing and white space access, being particularly mindful of practical considerations and solutions. In Part I, spectrum sharing implementation issues are considered in terms of hardware platforms and software architectures for realization of flexible and spectrally agile transceivers. Part II addresses practical mechanisms supporting spectrum sharing, including spectrum sensing for opportunistic spectrum access, machine learning and decision making capabilities, aggregation of spectrum opportunities, and spectrally-agile radio waveforms. Part III presents the ongoing work on policy and regulation for efficient and reliable spectrum sharing, including major recent steps forward in TV White Space (TVWS) regulation and associated geolocation database approaches, policy management aspects, and novel licensing schemes supporting spectrum sharing. In Part IV, business and economic aspects of spectrum sharing are considered, including spectrum value modeling, discussion of issues around disruptive innovation that are pertinent to opportunistic spectrum sharing and white space access, and business benefits assessment of the novel spectrum sharing regulatory proposal Licensed Shared Access. Part V discusses deployments of opportunistic spectrum sharing and white space access solutions in practice, including work on TVWS system implementations, standardization activities, and development and testing of systems according to the standards. Discusses aspects of pioneering standards such as the IEEE 802.22 "Wi-Far" standard, the IEEE 802.11af "White-Fi" standard, the IEEE Dynamic Spectrum Access Networks Standards Committee standards, and the ETSI Reconfiguration Radio Systems standards Investigates regulatory and regulatory-linked solutions assisting opportunistic spectrum sharing and white space access, including geo-location database approaches and licensing enhancements Covers the pricing and value of spectrum, the economic effects and potentials of such technologies, and provides detailed business assessments of some particularly innovative regulatory proposals The flexible and efficient use of radio frequencies is necessary to cater for the increasing data traffic demand worldwide. This book addresses this necessity through its extensive coverage of opportunistic spectrum sharing and white space access solutions. Opportunistic Spectrum Sharing and White Space Access: The Practical Reality is a great resource for telecommunication engineers, researchers, and students.

**The China Pakistan Axis** Jun 23 2019 China and Pakistan, India's two most powerful neighbours, share an 'all-weather' relationship that is as reputed for its depth as it is layered in secrecy. Based on years of research and interviews, Andrew Small has put together the story of China and Pakistan's growing, and in parts troubled, friendship. The China-Pakistan Axis is essential to understanding the economic, political and security map of Asia, especially India's neighbourhood. It explains Beijing's extraordinary support to Pakistan's nuclear programme and defence planning, their strategic cooperation on India, the United States and Afghanistan, and the implications for counter-terrorism efforts. A special chapter for this Indian edition brings the book up to date on China's involvement in the Taliban talks.

**Republic of Armenia** Jan 23 2022 The postcrisis recovery in Armenia has accelerated, but challenges remain. Economic policies have been broadly consistent with IMF advice. Credit growth has been strong, especially in foreign currency (FX). The banking system is sound. The central bank (CBA) is improving the regulatory and supervisory framework in line with Financial Sector Assessment Program (FSAP) recommendations. Risks are mainly on the downside and come from potential external shocks, political uncertainties, and regional conflicts. Strong adjustment is continuing in 2012 with the deficit again expected to be lower than budgeted.

*Lethal Autonomous Weapons* Aug 25 2019 The question of whether new rules or regulations are required to govern, restrict, or even prohibit the use of autonomous weapon systems has been the subject of debate for the better part of a decade. Despite the claims of advocacy groups, the way ahead remains unclear since the international community has yet to agree on a specific definition of Lethal Autonomous Weapon Systems and the great powers have largely refused to support an effective ban. In this vacuum, the public has been presented with a heavily one-sided view of Killer Robots. This volume presents a more nuanced approach to autonomous weapon systems that recognizes the need to progress beyond a discourse framed by the Terminator and HAL 9000. Re-shaping the discussion around this emerging military innovation requires a new line of thought and a willingness to challenge the orthodoxy. Lethal Autonomous Weapons focuses on exploring the moral and legal issues associated with the design, development and deployment of lethal autonomous weapons. In this volume, we bring together some of the most prominent academics and academic-practitioners in the lethal autonomous weapons space and seek to return some balance to the debate. As part of this effort, we recognize that society needs to invest in hard conversations that tackle the ethics, morality, and law of these new digital technologies and understand the human role in their creation and operation.

*Cyber Risks, Social Media and Insurance: A Guide to Risk Assessment and Management* Aug 18 2021 This publication provides unique and indispensable guidance to all in the insurance industry, other businesses and their counsel in identifying and understanding the risks (notably including cyber risks) they face by using social media in the business world and mitigating those risks through a compilation of best practices by industry experts and rulings by courts and regulatory authorities. It features analyses of pertinent policies, statutes and cases.

**The Budget of the United States Government** Jun 15 2021

*Haiti* Sep 06 2020 EXECUTIVE SUMMARY This is the final review under the Extended Credit Facility (ECF) arrangement. The program contributed to maintaining macroeconomic stability, and there was progress on structural reforms. The authorities intend to request a successor arrangement under the ECF. A new finance minister was appointed in April; uncertainty remains on the timing of elections.

Preliminary data suggest that GDP in FY2014 grew by 3.5–4 percent, while inflation increased slightly to about 5 percent. An increase in fuel prices (in October) should result in fiscal savings of at least 1 percent of GDP during FY2015. The March performance criterion on net international reserves (NIR) was met, but although the deficit was lower than projected, the performance criterion on net central bank credit to the central government was missed. Downside risks are significant and include a pull-back of Venezuela-related flows, a resumption of political tensions, and vulnerability to weather events. A total of SDR 1.638 million will become available upon completion of this review, bringing total disbursements under the ECF to SDR 40,950 million. Key Policy Recommendations: • The policy mix, in particular the adjustment going forward, should come from a lower fiscal deficit rather than from a tighter monetary policy. The FY2015 fiscal deficit should be reduced to mitigate financing risks as part of a medium-term plan to restore fiscal sustainability. • The central bank should let the exchange rate adjust more to market pressures. Intervention should be parsimonious, geared at avoiding excess volatility and disorderly movements in the exchange rate; it should be guided by fundamentals in the medium term. • Progress on structural reforms (including on the energy sector and on public financial management) should catalyze more donor support and is essential for supporting growth. A possible new ECF arrangement would entrench macroeconomic stability and promote policies to generate sustained GDP growth.

**United States of Jihad** Dec 10 2020 A riveting, panoramic look at "homegrown" Islamist terrorism from 9/11 to the present Since 9/11, more than three hundred Americans—born and raised in Minnesota, Alabama, New Jersey, and elsewhere—have been indicted or convicted of terrorism charges. Some have taken the fight abroad: an American was among those who planned the attacks in Mumbai, and more than eighty U.S. citizens have been charged with ISIS-related crimes. Others have acted on American soil, as with the attacks at Fort Hood, the Boston Marathon, and in San Bernardino. What motivates them, how are they trained, and what do we sacrifice in our efforts to track them? Paced like a detective story, *United States of Jihad* tells the entwined stories of the key actors on the American front. Among the perpetrators are Anwar al-Awlaki, the New Mexico-born radical cleric who became the first American citizen killed by a CIA drone and who mentored the Charlie Hebdo shooters; Samir Khan, whose Inspire website has rallied terrorists around the world, including the Tsarnaev brothers; and Omar Hammami, an Alabama native and hip hop fan who became a fixture in al Shabaab's propaganda videos until fatally displeasing his superiors. Drawing on his extensive network of intelligence contacts, from the National Counterterrorism Center and the FBI to the NYPD, Peter Bergen also offers an inside look at the controversial tactics of the agencies tracking potential terrorists—from infiltrating mosques to massive surveillance; at the bias experienced by innocent observant Muslims at the hands of law enforcement; at the critics and defenders of U.S. policies on terrorism; and at how social media has revolutionized terrorism. Lucid and rigorously researched, *United States of Jihad* is an essential new analysis of the Americans who have embraced militant Islam both here and abroad. — Washington Post, Notable Non-Fiction Books in 2016

*Regulating Information Asymmetry in the Residential Real Estate Market* Feb 21 2022 This book conducts a detailed examination of the current form of the Hong Kong residential property regulatory system: the 2013 Residential Properties (Firsthand Sales) Ordinance (Cap 621). The author sheds light on how the new legislation promotes a number of values including information symmetry, consumer protection, and the free market and business efficacy. It provides a detailed account of how the regulatory mechanism has evolved over the past three decades to catch unscrupulous sales tactics (such as selective information and/or misrepresentation of location, size, completion date and past transactions) and monitor sales practices in order to protect the interests of stakeholders in this ever-changing first-hand residential property market. This book breaks down this complicated subject matter by focusing a number of chapters each on a specific attribute of the residential property on sale. It then examines the various channels through which the information is communicated to the prospective buyer and discusses misrepresentation of the key information in sales of residential properties as criminal liability. The tension between consumer's rights on one hand and the pursuit of free market principles on the other is but one example of the conflicting values thoroughly discussed in the book, others include superstition vs. modernization and clarity vs. flexibility. Aimed at those with an interest in consumer protection and transparency-orientated legislation in commercialized real estate transactions, this book seeks to provide an in-depth discussion of the latest trends and directions of travel.

*Budget of the United States Government, Analytical Perspective, Fiscal Year 2014* Nov 01 2022 Contains analyses that are designed to highlight specified subject areas or provide other significant presentations of budget data that place the budget in perspective. This volume includes economic and accounting analyses; information on Federal receipts and collections; analyses of Federal spending; information on Federal borrowing and debt; baseline or current service estimates; and other technical presentations. This volume also contains supplemental material on a CD-ROM in the printed document with several detailed tables, including tables showing the budget by agency and account and by function, subfunction, and program.

**Affective Labour** Apr 01 2020 A critical examination of affective labour based on ethnographic fieldwork. It traces the centrality of affective labor in enabling and constraining prevailing norms and practices of race, citizenship, class, gender, and sexuality across multiple spatial contexts.

**Reconceptualizing English Education in a Multilingual Society** May 27 2022 This book brings together chapters that describe, investigate, and analyze the place of English in education in multilingual Philippines. Unlike most studies on languages in education, which take a neutral, de-contextualized stance, this volume take a pluricentric view of the English language by positioning it in relation to its varieties, as well as to other languages in the country. Because of the changing realities of English in the Philippines, traditional assumptions about the language as monolithic and unchanging, as well as about how it should be taught and learned, need to be revisited and re-conceptualized.

*Economic Governance in Europe* Oct 27 2019 The Euro-Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union (EU). Going beyond the existing literature, Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU, disaggregating three different dimensions: (1) the vertical relations of power between the member states and the EU institutions, (2) the relations of power between the political branches and the courts, and (3) the horizontal relations of power between the EU member states themselves. The first part of the book argues that, in the aftermath of the Euro-crisis, power has been shifting along each of these axes in paradoxical ways. In particular, through a comparison of the United States, Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs, an unprecedented level of judicialization of economic questions, and a growing imbalance between the member states in the governance of fiscal matters. As the book makes clear, however, each of these dynamics is a cause for concern - as it calls into question important constitutional values for the EU, such as the autonomy of the member states in taking decision about taxing and spending, the preeminence of the political process in settling economic matters, and the balance between state power and state equality. The second part of the book, therefore, devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends. In particular, Fabbrini considers the ideas of raising a fiscal capacity, restoring the centrality of the EU legislative process, and reforming the EU executive power, and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union.

**Anti-Terrorism Law and Foreign Terrorist Fighters** Jan 29 2020 Jessie Blackburn is a research fellow at the Centre for Socio-Legal Studies at the University of Oxford, UK. Deniz Kayis is currently the Associate for Chief Justice Allsop AO of the Federal Court of Australia. Nicola McGarrity is a senior lecturer and the Director of the Terrorism Law Reform Project at the University of New South Wales, Australia.

*Biopolitics of the More-Than-Human* Dec 30 2019 In *Biopolitics of the More-Than-Human* Joseph Pugliese examines the concept of the biopolitical through a nonanthropocentric lens, arguing that more-than-

human entities—from soil and orchards to animals and water—are actors and agents in their own right with legitimate claims to justice. Examining occupied Palestine, Guantánamo, and sites of US drone strikes in Afghanistan, Pakistan, Somalia, and Yemen, Pugliese challenges notions of human exceptionalism by arguing that more-than-human victims of war and colonialism are entangled with and subject to the same violent biopolitical regimes as humans. He also draws on Indigenous epistemologies that invest more-than-human entities with judicial standing to argue for an ethico-legal framework that will enable the realization of ecological justice. Bringing the more-than-human world into the purview of justice, Pugliese makes visible the ecological effects of human war that would otherwise remain outside the domains of biopolitics and law.

**Immigration Detention** Jul 05 2020 Before the turn of the century, few states used immigration detention. Today, nearly every state around the world has adopted immigration detention policy in some form. States practice detention as a means to address both the accelerating numbers of people crossing their borders, and the populations residing in their states without authorisation. This edited volume examines the contemporary diffusion of immigration detention policy throughout the world and the impact of this expansion on the prospects of protection for people seeking asylum. It includes contributions by immigration detention experts working in Australasia, the Americas, Europe, Africa and the Middle East. It is the first to set out a systematic comparison of immigration detention policy across these regions and to examine how immigration detention has become a ubiquitous part of border and immigration control strategies globally. In so doing, the volume presents a global perspective on the diversity of immigration detention policies and practices, how these circumstances developed, and the human impact of states exchanging individuals' rights to liberty for the collective assurance of border and immigration control. This text will be of key interest to scholars, students and practitioners of immigration, migration, public administration, comparative policy studies, comparative politics and international political economy.

**The Future of Foreign Intelligence** Sep 18 2021 Since the Revolutionary War, America's military and political leaders have recognized that U.S. national security depends upon the collection of intelligence. Absent information about foreign threats, the thinking went, the country and its citizens stood in great peril. To address this, the Courts and Congress have historically given the President broad leeway to obtain foreign intelligence. But in order to find information about an individual in the United States, the executive branch had to demonstrate that the person was an agent of a foreign power. Today, that barrier no longer exists. The intelligence community now collects massive amounts of data and then looks for potential threats to the United States. As renowned national security law scholar Laura K. Donohue explains in *The Future of Foreign Intelligence*, global communications systems and digital technologies have changed our lives in countless ways. But they have also contributed to a worrying transformation. Together with statutory alterations instituted in the wake of 9/11, and secret legal interpretations that have only recently become public, new and emerging technologies have radically expanded the amount and type of information that the government collects about U.S. citizens. Traditionally, for national security, the Courts have allowed weaker Fourth Amendment standards for search and seizure than those that mark criminal law. Information that is being collected for foreign intelligence purposes, though, is now being used for criminal prosecution. The expansion in the government's acquisition of private information, and the convergence between national security and criminal law threaten individual liberty. Donohue traces the evolution of U.S. foreign intelligence law and pairs it with the progress of Fourth Amendment jurisprudence. She argues that the bulk collection programs instituted by the National Security Agency amount to a general warrant, the prevention of which was the reason the Founders introduced the Fourth Amendment. The expansion of foreign intelligence surveillance momentum by advances in technology, the Global War on Terror, and the emphasis on securing the homeland now threatens to consume protections essential to privacy, which is a necessary component of a healthy democracy. Donohue offers a road map for reining in the national security state's expansive reach, arguing for a judicial re-evaluation of third party doctrine and statutory reform that will force the executive branch to take privacy seriously, even as Congress provides for the collection of intelligence central to U.S. national security. Alarming and penetrating, this is essential reading for anyone interested in the future of foreign intelligence and privacy in the United States.

**Fiscal Year 2016 Appendix, Budget of the United States Government** Jul 17 2021 Officially released on February 2, 2015. As one of the reference volumes of the FY2016 Budget request of the President, the popular Fiscal Year Budget Appendix volume presents detailed financial information on individual programs, Federal agencies and appropriation accounts that constitute the budget in tables and graphs. Includes for each Government department and agency the text of proposed appropriations language, budget schedules for each account, new legislative proposals, and explanations of the work to be performed and the funds needed, and proposed general provisions applicable to the appropriations of entire agencies or groups of agencies. Federal agency personnel, policy makers, think tank advocates, lawmakers, media organizations, and others interested in a "line item by line item" view of the President's proposed Fiscal year Budget will want this resource in their personal library collection. Public and academic libraries will want to make this annual reference product available for the general public in their Government collections. Students studying Public Finance, political scientists, and researchers will appreciate this detailed information with authoritative data legends presented in tables and graphs.

**The Struggle over Human Rights** Jul 25 2019 *The Struggle over Human Rights* uses empirical evidence to prove that pressures placed by the NIEO on the international system shaped the human rights doctrine of the Carter administration. Carter's strategy relegated economic rights to a "basic needs" approach and sharpened the definition of international human rights to serve the US world order.

**Model Rules of Professional Conduct** Aug 06 2020 *The Model Rules of Professional Conduct* provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
