The Essential First Year Jan 23 2022 As many of us become parents at a later stage, when our adult lives are well established, the arrival of a baby brings an unpredictability that can be hard to cope with. Those who are used to managing their time in the workplace can be tempted to try to manage their infant in the same way. So-called "controlled crying" has been recommended by many recent childcare guides, but parents should be aware of the high cost of such methods to their baby. In *The Essential First Year* Penelope Leach shows parents how they can reach a harmonious balance between their baby's needs and their own. While babies and their needs have not changed, our lifestyles have, and Penelope Leach has written the perfect manual for busy 21st century parents, which spans from pregnancy to the child's first birthday. The book is a gentle, but timely reminder that the fundamental purpose of having children is to share happiness. The happier a baby is, the more parents will enjoy being with him or her; being responsive to one's baby does not mean that it has to be at personal expense - the happiness of parents and baby is inextricably intertwined. *The Essential First Year* is not just full of sensible, practical advice, it is backed by more than ten years of new research into infant development, especially in brain growth, which now confirms, for instance, just how much fathers matter to their infant's progress, how girls' and boys' brains are different at birth (and develop differently) and how helping a baby to be calm, contented, amused, and interested leads to optimum development of body and brain. Using such information, Penelope Leach shows parents how to deal with problems as well as how to prevent them. Every parent wants to do the best for their baby and for the child that the baby will become. *The Essential First Year* gives parents the knowledge and the tools to nurture and care for every aspect of their infant's life - to meet the baby's physical needs, to stimulate their intellectual development and ensure their emotional well-being - and most importantly, *The Essential First Year* helps parents to simply enjoy being parents.

College Belonging Sep 06 2020 *College Belonging* reveals how colleges' and universities' efforts to foster a sense of belonging in their students are misguided. Colleges bombard new students with the message to "get out there!" and "find your place" by joining student organizations, sports teams, clubs and the like. Nunn shows that this reflects a flawed understanding of what belonging is and how it works. Drawing on the sociological theories of Emile Durkheim, *College Belonging* shows that belonging is something that members of a community offer to each other. It is something that must be given, like a gift. Individuals cannot simply walk up to a group or community and demand belonging. That's not how it works. The group must extend a sense of belonging to each and every member. It happens by making a person feel welcome, to feel that their presence matters to the group, that they would be missed if they were gone. This critical insight helps us understand why colleges' push for students simply to "get out there!" does not always work.

The Other Baby Book Sep 18 2021 What if the rules of modern motherhood were turned upside down? *The Other Baby Book: A Natural Approach to Baby's First Year* guides new and expecting mamas on a journey past "shoulds" and "musts," back to the heart of true joy and relationship. Motherhood has been targeted by advertisers, and bombarded by opinions masquerading as medical necessities. Massaro and Katz are helping

mothers reclaim a simpler, more connected first year with their babies. Readers will find eight fun-to-read chapters filled with baby-friendly practices, along with stories from moms in-the-know. In a soothing yet sassy voice, the authors present compelling research on topics like birth, holding your baby, breastfeeding, infant sleep, pottying babies (yes, really!), sign language, baby-led solids, and self-care for moms. The book also features contributions from leading practitioners in baby care: Dr. James McKenna, Dr. Janet Zand, Naomi Aldort, Gill Rapley, Nancy Mohrbacher, and more.

Project-based Learning in the First Year Nov 20 2021 Published in association with AAC&U. This book has two goals: First, to show the value of significant project-based work for first-year undergraduate students; and Second, to share how to introduce this work into first year programs. The authors spend the bulk of the book sharing what they have learned about this practice, including details about the administrative support and logistics required. They have also included sample syllabi, assignments and assessments, and classroom activities. The projects are applicable in a liberal arts education, in engineering programs, in two and four year colleges, in public and private universities--any institution with first year undergraduate students that wants to actively engage them in understanding and solving real-world problems through project work. Evidence shows that project-based learning, with real world, team-based educational experiences, increases the engagement and retention rate of underserved students. Introducing project-based learning in the first year can set the stage for incorporating the culture and practice of inclusive excellence as foundation for learning on college and university campuses.

Stories from First-year Composition Apr 13 2021 "Stories from First-Year Composition: Pedagogies that Foster Student Agency and Writing Identity counters perceptions of first-year composition (FYC) as a service course that prepares students for college writing. The collection identifies a new FYC "service", one that accommodates the realities of writing both within and outside of the academy. The collection also offers insights into effective FYC pedagogies and opportunities for readers to consider and think about their own teaching and their identities as FYC instructors. "Reflect Before Reading" prompts and questions and after-reading activities, including "Questions for Discussion and Reflection," writing activities that ask readers to apply ideas shared in chapters to their own FYC courses, suggestions for further reading, and multimedia components (accessible to readers through links within the collection itself and as resources available on the book's website) invite readers to interact with chapters and to develop deeper and more enriched understandings of their FYC teaching and an accompanying sense of agency so that they not only can teach FYC effectively but also advocate for its value and relevance"--

Effective Task Instruction in the First Year of School Oct 08 2020 It is well recognised that classroom teaching is highly complex and that teachers must navigate and negotiate myriad interactions just within a lesson in order to manage the learning opportunities of their students. What is less well recognised is precisely how these interactions are managed in real time during actual classroom interactions. This book is designed as an original, close-up account of processes by which children learn to become school learners in their first year of school, unpacking some of the recognised complexity of busy classrooms to hone in on what teachers and children do and how learning takes place. Using the tools of conversation analysis, the authors unpack a range of pedagogical interactions between teachers and children during normal class, focusing on procedural instructions and the outcomes of instructed activities. By including transcripts of recordings of classes in schools located in diverse communities, it is possible to see which aspects of classroom interaction may be impacted by external factors, such as children's language or cultural background, and which aspects are applicable regardless of such factors. The chapters examine teacher instructions and children's behaviour during instructions and during task performance in whole-class and small-group interactions. Effective Task Instruction in the First Year of School brings forward a much-needed wealth of knowledge into how to teach children in the first year of schooling and beyond in a way that is accessible for practising teachers, student teachers as well as education researchers.

The First Year Out Jan 11 2021 Wild parties, late nights, and lots of sex, drugs, and alcohol. Many assume these are the things that define an American teenager's first year after high school. But the reality is really quite different. As Tim Clydesdale reports in *The First Year Out*, teenagers generally manage the increased responsibilities of everyday life immediately after graduation effectively. But, like many good things, this comes at a cost. Tracking the daily lives of fifty young people making the transition to life after high school, Clydesdale reveals how teens settle into manageable patterns of substance use and sexual activity; how they meet the requirements of postsecondary education; and how they cope with new financial expectations. Most of them, we learn, handle the changes well because they make a priority of everyday life. But Clydesdale finds that teens also stow away their identities—religious, racial, political, or otherwise—during this period in exchange for acceptance into mainstream culture. This results in the absence of a long-range purpose for their lives and imposes limits on their desire to understand national politics and global issues, sometimes even affecting the ability to reconstruct their lives when tragedies occur. *The First Year Out* is an invaluable resource for anyone caught up in the storm and stress of working with these young adults.

Thriving in Transitions Nov 28 2019 When it was originally released, *Thriving in Transitions: A Research-Based Approach to College Student Success* represented a paradigm shift in the student success literature, moving the student success conversation beyond college completion to focus on student characteristics that promote high levels of academic, interpersonal, and intrapersonal performance in the college environment. The authors contend that a focus on remediating student characteristics or merely encouraging specific behaviors is inadequate to promote success in college and beyond. Drawing on research on college student thriving completed since 2012, the newly revised collection presents six research studies describing the characteristics that predict thriving in different groups of college students, including first-year students, transfer students, high-risk students, students of color, sophomores, and seniors, and offers recommendations for helping students thrive in college and life. New to this edition is a chapter focused on the role of faculty in supporting college student thriving.

Empowering the Community College First-Year Composition Teacher Nov 08 2020 "This volume is an inquiry into community college first-year pedagogy and policy at a time when change has not only been called for but also mandated by state lawmakers who financially control public education. It also acknowledges new policies that are eliminating developmental and remedial writing courses while keeping mind that, for most community college students, first-year composition serves as the last course they will take in the English department toward their associate's degree. This volume also serves as a call to action to change the way community colleges attend to faculty concerns. Only by listening to teachers can the concerns discussed in the volume be addressed; it is the teachers who see how societal changes intersect with campus policies and students' lives on a daily basis."--Adapted from back cover

What the Eyes Don't See Jun 27 2022 A NEW YORK TIMES NOTABLE BOOK • The dramatic story of the Flint water crisis, by a relentless physician who stood up to power. "Stirring . . . [a] blueprint for all those who believe . . . that 'the world . . . should be full of people raising their voices.'"—The New York Times "Revealing, with the gripping intrigue of a Grisham thriller." —O: The Oprah Magazine Here is the inspiring story of how Dr. Mona Hanna-Attisha, alongside a team of researchers, parents, friends, and community leaders, discovered that the children of Flint, Michigan, were being exposed to lead in their tap water—and then battled her own government and a brutal backlash to expose that truth to the world. Paced like a scientific thriller, *What the Eyes Don't See* reveals how misguided austerity policies, broken democracy, and callous bureaucratic indifference placed an entire city at risk. And at the center of the story is Dr. Mona herself—an immigrant, doctor, scientist, and mother whose family's activist roots inspired her pursuit of justice. *What the Eyes Don't See* is a riveting account of a shameful disaster that became a tale of hope, the story of a city on the ropes that came together to fight for justice, self-determination, and the right to build a better world for their—and all of our—children. Praise for *What the Eyes Don't See* "It is one thing to point out a problem. It is another thing altogether to step up and work to fix it. Mona Hanna-Attisha is a true American hero."—Erin Brockovich "A clarion call to live a life of purpose."—The Washington Post "Gripping . . . entertaining . . . Her book has power precisely because she takes the events she recounts so personally. . . . Moral outrage present on every page."—The New York Times Book Review "Personal and emotional. . . She vividly describes the effects of lead poisoning on her young patients. . . . She is at her best when recounting the detective work she undertook after a tip-off about lead levels from a friend. . . . 'Flint will not be defined by this crisis,' vows Ms. Hanna-Attisha."—The Economist "Flint is a public health disaster. But it was Dr. Mona, this caring, tough pediatrician turned detective, who cracked the case."—Rachel Maddow

Cribsheet Aug 25 2019 From the author of *Expecting Better* and *The Family Firm*, an economist's guide to the early years of parenting. "Both refreshing and useful. With so many parenting theories driving us all a bit batty, this is the type of book that we need to help calm things down." —LA Times "The book is jam-packed with information, but it's also a delightful read because Oster is such a good writer." —NPR With *Expecting Better*, award-winning economist Emily Oster spotted a need in the pregnancy market for advice that gave women the information they needed to make the best decision for their own pregnancies. By digging into the data, Oster found that much of the conventional pregnancy wisdom was wrong. In *Cribsheet*, she now tackles an even greater challenge: decision-making in the early years of parenting. As any new parent knows, there is an abundance of often-conflicting advice hurled at you from doctors, family, friends, and strangers on the internet. From the earliest days, parents get the message that they must make certain choices around feeding, sleep, and schedule or all will be lost. There's a rule—or three—for everything. But the benefits of these choices can be overstated, and the trade-offs can be profound. How do you make your own best decision? Armed with the data, Oster finds that the conventional wisdom doesn't always hold up. She debunks myths around breastfeeding (not a panacea), sleep training (not so bad!), potty training (wait until they're ready or possibly bribe with M&Ms), language acquisition (early talkers aren't necessarily geniuses), and many other topics. She also shows parents how to think through freighted questions like if and how to go back to work, how to think about toddler discipline, and how to have a relationship and parent at the same time. Economics is the science of decision-making, and *Cribsheet* is a thinking parent's guide to the chaos and frequent misinformation of the early years. Emily Oster is a trained expert—and mom of two—who can empower us to make better, less fraught decisions—and stay sane in the years before preschool.

An all-new chapter on buying for baby helps parents navigate through today’s dizzying gamut of baby products, nursery items, and gear. Also new: tips on preparing homemade baby food, the latest recommendations on starting solids, research on the impact of screen time (TVs, tablets, apps, computers), and “For Parents” boxes that focus on mom’s and dad’s needs.
