*Foucault and International Relations** Dec 13 2020 The recent debate about biopolitics in International Relations (IR) theory may well prove to be one of the most provocative and rewarding engagements with the concept of power in the history of the discipline. Building on Foucault's arguments concerning the role played by the concept of security in 19th-century liberal government, numerous IR scholars are now arguing for the relevance of his theories of biopolitics and governmentality for understanding the Global War on Terror (GWOT) and broader issues of security and governance in the post 9/11 world. Conversely, others have criticized this idea. Marxist and Communitarian scholars have challenged the notion that the

In this revised, second edition, Donald E. Weatherbee lucidly explains the dynamics of the Southeast Asian subsystem as a struggle for autonomy in pursuit of national interests. He explores three important questions, the answers to which will shape the future Southeast Asia. Will democratic regimes transform international relations in Southeast Asia? Will national leaders succeed in reinventing ASEAN as a more effective collaborative mechanism? Finally, how will the evolving Chinese position, balancing and perhaps displacing the United States as Asia's great

power, affect Southeast Asia's struggle for autonomy?

International Relations and the Arctic: Understanding Policy and Governance Jul 28 2019 Increased global interest in the Arctic poses challenges to contemporary international relations and many questions surround exactly why and how Arctic countries are asserting their influence and claims over their northern reaches and why and how non-Arctic states are turning their attention to the region. Despite the inescapable reality in the growth of interest in the Arctic, relatively little analysis on the international relations aspects of such interest has been done. Traditionally, international relations studies are focused on particular aspects of Arctic relations, but to date there has been no comprehensive effort to explain the region as a whole. Literature on Arctic politics is mostly dedicated to issues such as development, the environment and climate change, or indigenous populations. International relations, traditionally interested in national and international security, has been mostly silent in its engagement with Arctic politics. Essential concepts such as security, sovereignty, institutions, and norms are all key aspects of what is transpiring in the Arctic, and deserve to be explained in order to better comprehend exactly why the Arctic is of such interest. The sheer number of states and organizations currently involved in Arctic international relations make the region a prime case study for scholars, policymakers and interested observers. In this first systematic study of Arctic international relations, Robert W. Murray and Anita Dey Nuttall have brought together a group of the world's leading experts in Arctic affairs to demonstrate the multifaceted and essential nature of circumpolar politics. This book is core reading for political scientists, historians, anthropologists, geographers and any other observer interested in the politics of the Arctic region.

Decentering International Relations Dec 01 2019 Decentering International Relations seeks to actively confront, resist, and rewrite International Relations (IR), a heavily politicized field that is deeply centered in the North/West and privileges certain perspectives, pedagogies, and practices. Is it possible to break the chain of signifiers that always leads IR studies back to the US and its European allies? Through engagement with a variety of theories (ranging beyond the usual 'mainstream' versus 'critical/alternative' binary), and conversations with scholars, activists, and students, the authors invite the reader to participate in an accessible yet provocative experiment to decentre the North/West when we learn, study and do IR. In particular, they examine how the pressing issues of 'human rights', 'globalization', 'peace and security', and 'indigeneity' are simultaneously normative inventions meant to sustain particular power structures and sites for insurgent and subversive attempts to live IR at the margins. Selbin and Nayak have written a remarkable and provocative re-envisioning of a globally important subject.

Joy and International Relations Oct 11 2020 This book aims to develop new methodology for the study of international relations (IR) based on joy, informed by current thinking about posthumanism, feminist theory and positive psychology. It examines how the mechanistic-deterministic worldview derived from the Newtonian model has influenced the epistemology and methodology of IR (i.e., the idea that the world is constituted of independent fragments), and seeks ways to develop a new methodology for IR by drawing on the potential of a non-fragmented worldview. The author argues that it is this modern Western view of human beings (or societies) as isolated and separate from the world that prevents IR from finding new solutions to the questions of war and conflict. Drawing upon case studies, testimonies and examples from film, this book instead proposes joy as an alternative methodology for studying IR, exploring the possibility of self-healing in physical and emotional trauma in extreme violent conditions. The author also discusses how posthumanism contributes to positive psychology in understanding happiness and empowerment, and demonstrates how these findings can further widen the study of IR. This book will be of much interest to students of gender studies, war and conflict studies, IR theory and critical security studies.

Reflections on the Posthuman in International Relations Jan 26 2022 By revealing the fragility of mainstream narratives of the 'human, 'each author in this collection contributes to an unsettling vision of a posthuman world

The Politics of Secularism in International Relations Aug 28 2019 Conflicts involving religion have returned to the forefront of international relations. And yet political scientists and policymakers have continued to assume that religion has long been privatized in the West. This secularist assumption ignores the contestation surrounding the category of the "secular" in international politics. The Politics of Secularism in International Relations shows why this thinking is flawed, and provides a powerful alternative. Elizabeth Shakman Hurd argues that secularist divisions between religion and politics are not fixed, as commonly assumed, but socially and historically constructed. Examining the philosophical and historical legacy of the secularist traditions that shape European and American approaches to global politics, she shows why this matters for contemporary international relations, and in particular for two critical relationships: the United States and Iran, and the European Union and Turkey. The Politics of Secularism in International Relations develops a new approach to religion and international relations that challenges realist, liberal, and constructivist assumptions that religion has been excluded from politics in the West. The first book to consider secularism as a form of political authority in its own right, it describes two forms of secularism and their far-reaching global consequences.

The Politics of International Economic Relations May 18 2021 The first and definitive book of its kind, Joan Spero's The Politics of International Economic Relations has been fully updated to reflect the sweeping changes in the international arena. With the expertise of co-author Jeffrey Hart, the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War, economic polarization in developing nations and the roots of economic decline in centrally planned economies. A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy. Ideal as a supplement to the International Relations course or as the core text in International Political Economy, Spero and Hart's The Politics of International Economic Relations continues to give students the breadth and depth of scholarship needed to understand the politics of world economy.

Hierarchy in International Relations Jun 18 2021 International relations are generally understood as a realm of anarchy in which countries lack any superior authority and interact within a Hobbesian state of nature. In Hierarchy in International Relations, David A. Lake challenges this traditional view, demonstrating that states exercise authority over one another in international hierarchies that vary historically but are still pervasive today. Revisiting the concepts of authority and sovereignty, Lake offers a novel view of international relations in which states form social contracts that bind both dominant and subordinate members. The resulting hierarchies have significant effects on the foreign policies of states as well as patterns of international conflict and

cooperation. Focusing largely on U.S.-led hierarchies in the contemporary world, Lake provides a compelling account of the origins, functions, and limits of political order in the modern international system. The book is a model of clarity in theory, research design, and the use of evidence. Motivated by concerns about the declining international legitimacy of the United States following the Iraq War, Hierarchy in International Relations offers a powerful analytic perspective that has important implications for understanding America's position in the world in the years ahead.

The Oxford Handbook of International Relations Apr 04 2020 The Oxford Handbook of International Relations offers the most authoritative and comprehensive overview to date of the field of international relations. The Handbook takes as its central themes the interaction between empirical and normative inquiry that permeates all theorizing in the field and the way in which contending approaches have shaped one another. In doing so, the Handbook provides an authoritative and critical introduction to the subject and establishes a sense of the field as a dynamic realm of argument and inquiry. The Oxford Handbook of International Relations will be essential reading for all of those interested in the advanced study of global politics and international affairs.

Bridging the Theory-Practice Divide in International Relations Mar 16 2021 There is a widening divide between the data, tools, and knowledge that international relations scholars produce and what policy practitioners find relevant for their work. In this first-of-its-kind conversation, leading academics and practitioners reflect on the nature and size of the theory-practice divide. They find the gap varies by issue area and over time. The essays in this volume use data gathered by the Teaching, Research, and International Policy (TRIP) Project over a fifteen-year period. As a whole, the volume analyzes the structural factors that affect the academy's ability to influence policy across issue areas and the professional incentives that affect scholars' willingness to attempt to do so. Individual chapters explore these questions in the areas of trade, finance, human rights, development, environment, nuclear weapons and strategy, interstate war, and intrastate conflict. Each substantive chapter is followed by a response from a policy practitioner, providing their perspective on the gap and the possibility for academic work to have an impact. Bridging the Theory-Practice Divide in International Relations provides concrete answers and guidance about how and when scholarship can be policy relevant.

The United Nations Dec 25 2021 The purpose of this edited collection is to appraise the role of the UN in relation to the principle of self-determination. This book takes a practical approach to discussing what role the UN plays in cases of self-determination and also ventures beyond this area's discussions of the inherent conflict between self-determination and sovereignty.

Nationalisms in International Politics Oct 30 2019 How the ideas that animate nationalism influence whether it causes—or calms—conflict With nationalism on the rise around the world, many worry that nationalistic attitudes could lead to a surge in deadly conflict. To combat this trend, federations like the European Union have tried to build inclusive regional identities to overcome nationalist distrust and inspire international cooperation. Yet not all nationalisms are alike. Nationalisms in International Politics draws on insights from psychology to explore when nationalist commitments promote conflict—and when they foster cooperation. Challenging the received wisdom about nationalism and military aggression, Kathleen Powers differentiates nationalisms built on unity from those built on equality, and explains how each of these norms give rise to distinct foreign policy attitudes. Combining innovative US experiments with fresh analyses of European mass and elite survey data, she argues that unity encourages support for external conflict and undermines regional trust and cooperation, whereas equality mitigates militarism and facilitates support for security cooperation. Nationalisms in International Politics provides a rigorous and compelling look at how different forms of nationalism shape foreign policy attitudes, and raises important questions about whether transnational identities increase support for cooperation or undermine it.

The Politics of Haunting and Memory in International Relations Jul 08 2020 International Relations has traditionally focused on conflict and war, but the effects of violence including dead bodies and memorialization practices have largely been considered beyond the purview of the field. Drawing on Jacques Derrida's notion of hauntology to consider the politics of life and death, Auchter traces the story of how life and death and a clear division between the two is summoned in the project of statecraft. She argues that by letting ourselves be haunted, or looking for ghosts, it is possible to trace how statecraft relies on the construction of such a dichotomy. Three empirical cases offer fertile ground for complicating the picture often painted of memorialization: Rwandan genocide memorials, the underexplored case of undocumented immigrants who die crossing the US-Mexico border, and the body/ruins nexus in 9/11 memorialization. Focusing on the role of dead bodies and the construction of particular spaces as the appropriate sites for memory to be situated, it offers an alternative take on the new materialisms movement in international relations by asking after the questions that arise from an ethnographic approach to the subject: viewing things from the perspective of dead bodies, who occupy the shadowy world of post-conflict international politics. This work will be of great interest to students and scholars of critical international relations, security studies, statecraft and memory studies.

Fieldwork as Failure: Living and Knowing in the Field of International Relations Feb 24 2022 This volume aims to unsettle the silence that surrounds fieldwork failure in both methods training and academic publications. While fieldwork has gradually evolved into standard practice in IR research, the question of possible failures in field-based knowledge production remains conspicuously absent from both graduate training and writing in IR. This volume fills that lacuna by engaging with fieldwork as a site of knowledge production and inevitable failure. It develops methodological discussions in IR in two novel ways. First, it engages failure through experience-near and practice-based perspectives, with authors speaking from their experiences. And secondly, it delves into the politics of methods in IR and the discipline more generally to probe ways in which the realities of research condition scholarly claims. Contributors Berit Bliesemann de Guevara, Lydia C. Cole, Jan Daniel, Sezer ?dil Gô?ü?, Johannes Gunesch, Danielle House, Xymena Kurowska, Ewa Maczynska, Emma Mc Cluskey, Holger Niemann, Amina Nolte, Desirée Poets and Renata Summa.

Time, Temporality and Global Politics Sep 02 2022 International Relations scholars have traditionally expressed little direct interest in addressing time and temporality. Yet, assumptions about temporality are at the core of many theories of world politics and time is a crucial component of the human condition and our social reality. Today, a small but emerging strand of literature has emerged to meet questions concerning time and temporality and its relationship to International Relations head on. This volume provides a platform to continue this work. The chapters in this book address subjects such as identity, terrorism, war, gender relations, global ethics and governance in order to demonstrate how focusing on the temporal aspects of such phenomena can enhance our understanding of the world. Contributors: Andrew Hom, Christopher McIntosh, Liam Stockdale, Alasdair McKay, Shahzad Bashir, Kevin K. Birth, Valerie Bryson, Kathryn Marie Fisher, Robert Hassan, Caroline Holmqvist, Kimberly Hutchings, Tim Luecke, Tom Lundborg, Tim Stevens and Ty Solomon.

Contesting the Global Order May 30 2022 Examines how events in the Cold War and post—Cold War periods shaped the intellectual projects of Perry Anderson and Immanuel Wallerstein. Contesting the Global Order explores what it means to be a radical intellectual as political hopes fade. Gregory P. Williams chronicles the evolution of intellectual visionaries Perry Anderson and Immanuel Wallerstein, who despite altered circumstances for radical change, continued to advance creative interpretations of the social world. Wallerstein and Anderson, whose hopes were invested in a more egalitarian future, believed their writings would contribute to socialism, which they anticipated would be a postcapitalist future of relative social, economic, and political equality. However, by the 1980s dreams of socialism had faded and they had to face the reality that socialism was neither close nor inevitable. Their sensitivity to current events, Williams argues, takes on new significance in this century, when many scholars are grappling with the issue of change in a world of declining state power. Gregory P. Williams is Assistant Professor of Political Science and International Affairs at the University of Northern Colorado.

Pragmatism in International Relations Jan 02 2020 This collection of essays introduces pragmatism to the study of international relations and evaluates its potential for the theory and practice of global politics. Seeking to reorient the discipline of International Relations (IR) towards practices and problematic situations, the editors of this volume draw on the pragmatist tradition to provide critical inspiration for this task. Their book, organised into four distinct parts, aims to outline the potential of pragmatism to reconstruct IR. Through such an approach this volume seeks to reinvigorate the discipline and bridge the gap between IR academic communities in the US, UK, and continental Europe. This pioneering volume provides: the first book-length evaluation of the potential pragmatism holds for the practice as well as the epistemological, theoretical and normative debates within the discipline of IR theoretical reflections and empirical studies in the area of diplomacy, international law, public (environmental) policy and the Arab-Israeli conflict highly original contributions by prominent scholars in the field of IR, International Law, Sociology and Social Theory Drawing on research from several disciplines, Pragmatism in International Relations will be vital reading for students and scholars of International Relations, International Relations Theory, and Social Theory.

International Relations Theory Nov 04 2022 This book is designed as a foundational entry point to International Relations theory. As a beginner's guide, it has been structured to condense the most important information into the smallest space and present that information in the most accessible manner. The first half of the book covers the established theories that are most commonly taught in undergraduate programmes. The book then expands to present emerging approaches and offer wider perspectives. Each chapter sets out the basics of a theory whilst also applying it to a real-world event or issue. This format creates a lively, readable and relevant guide that will help students to see not only what theories are, but why they matter. Unlike most other textbooks, there are no boxes,

charts, pictures or exercises included. The philosophy underpinning this book is that these things can be a distraction. This book, like others in the E-IR Foundations series, is designed to capture attention with an engaging narrative. Editors Stephen McGlinchey, Rosie Walters and Christian Scheinpflug.
