Vespa Aug 26 2019 April 1946 was the debut date of the revolutionary little two-wheel vehicle, which, as well as leaving an indelible mark on the history of transport, became a real cultural phenomenon to successive generations. Simple and elegant, practical and comfortable, these are some of the characteristics that have ensured the popular scooter an unrepeatable success, with 35,000 of them built in 1949 alone. Sixty-five years after its birth, the Vespa, of which over 17 million have been produced, has affirmed itself throughout the world. This book covers the fascinating epic of the Vespa, from its debut to the present day, through hundreds of pictures and invaluable documents of its various epochs.

The History of the Vespa May 16 2021 Despite the symbolic capital and the global commercial success of the Vespa scooter, there is no academic book dealing with its history, only literature produced by the company itself or by scooter enthusiasts. The origins of the Vespa are shrouded in mist, entrusted more to myth than to historical truth. Based on lengthy research carried out in Piaggio's historical archives and on an interdisciplinary approach, this volume aims to fill this gap. It shows how the Vespa took techniques from the most advanced aeronautical industries in the world, adapting and hybridizing them in an original way, and how the company disseminated its models in the transnational social space.

Vespa - The Story of a Cult Classic in Pictures Dec 23 2021 Eighteen million Vespas have buzzed their way into the world since 1946. Stood end to end, they would form a line measuring 32,000 kilometres – 20,000 miles – in length. This is an almost inconceivable statistic, as with many things that transcend conventional measures and at some point achieve cult status. How did the little machine come so far? The answer is simple. The Vespa has always remained the Vespa, true to itself, and has what others lack: real character! This book tells the Vespa's story via over 470 photos, corrects many misconceptions and lets the reader become immersed in the culture of Vespa and la bella vita.

Perspectives on the L2 Phrasicon Mar 14 2021 This is the very first book to investigate the field of phraseology from a learner corpus perspective, bringing together studies at the cutting edge of corpus-based research into phraseology and language learners. The chapters include learner-corpus-based studies of phraseological units in varieties of learner language differentiated in terms of task and/or learner variables, compared with each other or with one or more reference corpora; mixed-methods studies that combine learner corpus data with more experimental data types (e.g. eyetracking); and instruction-oriented studies that show how learner-corpus-based insights can be used to inform second language (L2) teaching and testing. The detailed analysis of a wide range of multiword units (collocations, lexical bundles, lexico-grammatical patterns) and extensive learner corpus data provide the reader with a comprehensive theoretical, methodological and applied perspective onto L2 use in a wide range of situations. The knowledge gained from these learner corpus studies has major implications for L2 theory and practice and will help to inform pedagogical assessment and practice.

The A-Z of popular Scooters & Microcars Sep 19 2021 This is mainly a photographic reference book to classic scooters and microcars with specification data presented in A to Z order of manufacturer. There are also nostalgic recollections by the author based on ownership and personal experience. In the middle

1950s as a teenager Mike Dan became interested in these then newly-arrived forms of transport. Eventually Mike owned a series of scooters and a microcar. He became involved in Scooter and Microcar Clubs and took part in many local and national sporting events gaining a collection of awards and trophies. In the mid 1980s he had time again to visit many indoor and outdoor classic vehicle shows. Eventually this led to a renewed personal involvement in the restoration of a series of over twenty classic scooters and three classic microcars. This highly entertaining book and reference source is therefore written with the authority of a lifetime enthusiast.
