**Household Counts** Aug 27 2019 "The Canadian census taken in 1901 has surprising things to say about the family as a social grouping and cultural construct at the turn of the twentieth century. Although the nuclear-family household was the most frequent type of household, family was not a singular form or structure at all; rather, it was a fluid micro-social community through which people lived and moved. There was no one "traditional" family, but rather many types of families and households, each with its own history ... to explore the demographic context of families in Canada using the 1901 census. Split into five sections, the collection covers such topics as family demography, urban families, the young and old, family and social history, and smaller groups as well. The remarkable plasticity of family and household that *Household Counts* reveals is of critical importance to our understanding of nation-building in Canada. This collection not only makes an important contribution to family history, but also to the widening intellectual exploration of historical censuses."--Pub. description.

**Magistrates, Police and People** Dec 12 2020 Based on extensive research in judicial and official sources, Donald Fyson offers the first comprehensive study of the everyday workings of criminal justice in Quebec and Lower Canada. Focusing on the justices of the peace and their police, Fyson examines both the criminal justice system itself, and the system in operation as experienced by those who participated in it. Fyson contends that, although the system was fundamentally biased, its flexibility provided a source of power for ordinary citizens. At the same time, the system offered the colonial state and its elites a powerful, though often faulty, means of imposing their will on Quebec society. This study will challenge many received historical interpretations, providing new insight into criminal justice in early Quebec.

**Liberalism and Hegemony** Jan 01 2020 In 2000, Ian McKay, a highly respected historian at Queen's University, published an article in the Canadian Historical Review entitled "The Liberal Order Framework: A Prospectus for a Reconnaissance of Canadian History." Written to address a crisis in Canadian history, this detailed, programmatic, and well-argued article had an immediate impact on the field. Proposing that Canadian history should be mapped through a process of reconnaissance, and that the Canadian state should be understood as a project of liberal rule in North America, the essay prompted debate immediately upon publication. Liberalism and Hegemony assembles some of Canada's finest historians to continue the debate sparked by McKay's essay. The essays collected here explore the possibilities and limits presented by "The Liberal Order Framework" for various segments of Canadian history, and within them, the paramount influence of liberalism throughout the nineteenth and twentieth centuries is debated in the context of aboriginal history, environmental history, the history of the family, the development of political thought and ideas, and municipal governance. Like McKay's "The Liberal Order Framework," which is included in this volume with a response to recent criticism, Liberalism and Hegemony is a fascinating foray into current historical thought and provides the historical community with a book that will act both as a reference and a guide for future research.

**Psychoanalysis and Black Novels** Aug 08 2020 Although psychoanalytic theory is one of the most potent and influential tools in contemporary literary criticism, to date it has had very little impact on the study of African American literature. Critical methods from the disciplines of history, sociology, and cultural studies have dominated work in the field. Now, in this exciting new book by the author of *Domestic Allegories: The Black Heroine's Text at the Turn of the Century*, Claudia Tate demonstrates that psychoanalytic paradigms can produce rich and compelling readings of African American textuality. With clear and accessible summaries of key concepts in Freud, Lacan, and Klein, as well as deft reference to the work of contemporary psychoanalytic critics of literature, Tate explores African-American desire, alienation, and subjectivity in neglected novels by Emma Kelley, W.E.B. Du Bois, Richard Wright, Zora Neale Hurston, and Nella Larsen. Her pioneering approach highlights African American textual realms within and beyond those inscribing racial oppression and modes of black resistance. A superb introduction to psychoanalytic theory and its applications for African American literature and culture, this book creates a sophisticated critical model of black subjectivity and desire for use in the study of African American texts.

**Segmental and Prosodic Issues in Romance Phonology** Jun 05 2020 This volume is a collection of cutting-edge research papers written by well-known researchers in the field of Romance phonetics and phonology. An important goal of this book is to bridge the gap between traditional Romance linguistics — with its long and rich tradition in data collection, cross-language comparison, and phonetic variation — and laboratory phonology work. The book is organized around three main themes: segmental processes, prosody, and the acquisition of segments and prosody. The various articles provide new empirical data on production, perception, sound change, first and second language learning, rhythm and intonation, presenting a state-of-the-art overview of research in laboratory phonology centred on Romance languages. The Romance data are used to test the predictions of a number of theoretical frameworks such as gestural phonology, exemplar models, generative phonology and optimality theory. The book will constitute a useful companion volume for phoneticians, phonologists and researchers investigating sound structure in Romance languages, and will serve to generate further interest in laboratory phonology.

Benchmarking Identifiable Intangibles and Their Useful Lives in Business Combinations Mar 27 2022 As valuation analysts know only too well, analysts, auditors and CFOs have been on their own in estimating remaining useful lives of intangible assets without significant benchmarks ever since the Financial Accounting Standards Board (FASB) created the uniform procedure whereby the acquiring entity in a business combination must perform a purchase price allocation (PPA) that matches the purchase price to asset values of the acquired company, including, importantly intangible assets. Benchmarking Identifiable Intangibles and Their Useful Lives in Business Combinations delivers a compilation of reported data, particularly on useful lives of intangible assets as reflected in over 360 purchase price allocations. Analysts will use the data to benchmark what intangibles are being discovered, categorized and valued in what industries, and the ratios of individual intangible asset categories to total assets. The guide is easy to use, allowing readers to view the data extracted from over 360 PPAs in three sections: Review of intangible asset categories complete with detailed descriptions of valuation approaches and checklists of factors to consider View data slices organized by intangible View intangible categories data by industry Benchmarking Identifiable Intangibles and Their Useful Lives in Business Combinations also delivers key statistical data that can be used to benchmark non-compete agreements, support statistical claims of the dominance of intangible assets and assist in identifying amortization tendencies.

*Canadian Economic History* Oct 22 2021 Through three centuries of development, the history of the Canadian economy reflects the shifting roles of natural resources, industrializations, and international trade. This volume, a standard in the field since its initial publication in 1958, presents a comprehensive account of these and other factors in the growth of the Canadian economy from the time of the earliest European expansion into the Americas. The authors consider economic organization both on the level of the national economy and on that of the individual business unit. Among the subjects examined are the growth of the fur, fishing, and timber trades; the impact of successive wars; money and banking; the development of railway and canal systems; the wheat economy; the growth of organized labour; and twentieth-century patterns of investment and trade. The focus throughout is on the role played by business organizations, large and small, working with government, in creating a national economy in Canada.

**Consumers in the Bush** Oct 10 2020 General stores are essential to the image of a colonial village. Many historians, however, still base their stories of settlement on the notion of rural self-sufficiency, begging the question: if general stores were so common, who were their customers? To answer this, *Consumers in the Bush* draws on the account books of country stores, rich evidence that has rarely been used. Douglas McCalla considers more than 30,000

transactions on the accounts of 750 families at seven Upper Canadian stores between 1808 and 1861. These customers were typical of rural society - farmers, artisans, labourers, and often women. At village stores they found a wide variety of products, most imported from Britain, a few from the United States, and a surprising number that were produced locally. Three chapters focus on the major product categories of dry goods, groceries, and hardware; a fourth considers local products, and a fifth addresses a variety of items - from household goods to footwear to school books. In telling us about the goods colonists bought, this book explores what they were used for and the stories they allow us to tell about rural lives and experience. By seeing rural Upper Canadians as consumers, *Consumers in the Bush* reveals them as full participants in the rapidly changing nineteenth-century global world of goods.

**Debt's Dominion** Apr 15 2021 Bankruptcy in America, in stark contrast to its status in most other countries, typically signifies not a debtor's last gasp but an opportunity to catch one's breath and recoup. Why has the nation's legal system evolved to allow both corporate and individual debtors greater control over their fate than imaginable elsewhere? Masterfully probing the political dynamics behind this question, David Skeel here provides the first complete account of the remarkable journey American bankruptcy law has taken from its beginnings in 1800, when Congress lifted the country's first bankruptcy code right out of English law, to the present day. Skeel shows that the confluence of three forces that emerged over many years--an organized creditor lobby, pro-debtor ideological currents, and an increasingly powerful bankruptcy bar--explains the distinctive contours of American bankruptcy law. Their interplay, he argues in clear, inviting prose, has seen efforts to legislate bankruptcy become a compelling battle royale between bankers and lawyers--one in which the bankers recently seem to have gained the upper hand. Skeel demonstrates, for example, that a fiercely divided bankruptcy commission and the 1994 Republican takeover of Congress have yielded the recent, ideologically charged battles over consumer bankruptcy. The uniqueness of American bankruptcy has often been noted, but it has never been explained. As different as twenty-first century America is from the horse-and-buggy era origins of our bankruptcy laws, Skeel shows that the same political factors continue to shape our unique response to financial distress.

The authors of this multidisciplinary study describe the law and the statistics in clear, nontechnical language, combining a thorough statistical description of the social and economic position of consumer bankrupts with human portraits of the debtors and creditors whose journeys have ended in bankruptcy court. **Backwoods Consumers and Homespun Capitalists** Nov 10 2020 In the late eighteenth and early nineteenth centuries, a local economy made up of settlers, loggers, and business people from Lower Canada, New Brunswick, and New England was established on the banks of the Upper St. John River in an area known as the Madawaska Territory. This newly created economy was visibly part of the Atlantic capitalist system yet different in several major ways. In *Backwoods Consumers and Homespun Capitalists*, Béatrice Craig examines and describes this economy from its origins in the native fur trade, the growth of exportable wheat, the selling of food to new settlers, and of ton timbre to Britain. Craig vividly portrays the role of wives who sold homespun fabric and clothing to farmers, loggers, and river drivers, helping to bolster the community. The construction of saw, grist, and carding mills, and the establishment of stores, boarding houses, and taverns are all viewed as steps in the development of what the author calls "homespun capitalists." The territory also participated in the Atlantic economy as a consumer of Canadian, British, European, west and east Indian and American goods. This case study offers a unique examination of the emergence of capitalism and of a consumer society in a small, relatively remote community in the backwoods of New Brunswick.

**Politics of Codification** Feb 11 2021 Young interprets codification as part of a larger process that included the collapse of the Lower Canadian rebellions, the decline of seigneurialism, expansion of bourgeois democracy in central Canada, professionalization of the bar, and formation of the institutional state. Central to codification was a profound ideological shift in Lower Canadian society that gave priority to exchange and individual property rights. Young examines the evolution of codification from its nationalist origins in the 1820s and 1830s into a Civil Code that was integral to Confederation and became a flagship of bilingualism in Quebec. The formation of the commission, the work of the codifiers, and the reaction of the anglophone minority and the Roman Catholic hierarchy are considered, as is the Code's meticulous blending of a conservative social vision with the principles of freedom of property. The Politics of Codification will be of great interest to students of law, members of the legal professions, and Canadian social and legal historians.
