[Examinations in Singapore](#) Oct 11 2020 The first book to explore the development of Singapore's much-talked-about education and examination system, this volume juxtaposes examinations with its immediate context of education and wider context of politics, economy and society. The study covers three broad historical periods: Examinations in Singapore from 1891 to 1945; The Post-War Years from 1946 to the 1970s; and Charting Our Destiny from the 1980s to 2007. In the British period up to 1941, the local examinations were conducted by the vernacular schools, and external examinations by the University of Cambridge Local Examinations Syndicate. There was a lack of systematic effort to establish a uniform system of education and examinations. During the Japanese Occupation, examinations were conducted by the Japanese authorities and, unexpectedly, the Cambridge examinations continued in the Sime Road Camp. In the post-war period and particularly after Singapore was granted self-government, the establishment of a national education system was followed by the emergence of national examinations: the Primary School Leaving Examinations and the Singapore-Cambridge GCE N/O/A Levels for every school-going child in Singapore. Thereafter, the nature of national examinations evolved with the changing needs of education and the nation. At the turn of the century, with the Ministry of Education's decision to take greater control of examinations, the Singapore Examinations and Assessment Board was established, to oversee new developments in examinations. Unlike most literature on education where examinations are often mentioned as an outcome of educational goals and objectives, this book focuses on examinations per se. Examinations have gained a momentum of their own, and it is interesting to note the development of examinations against the backdrop of the broader history of Singapore and of education in Singapore. Sample Chapter(s). Chapter 1: Trace the development of examinations in Singapore during the British colonial period up to 1941. (3,043 KB). Examinations in Singapore book Launch (124 KB). Contents: Examinations in Singapore (1891-1945); Trace the Development of Examinations in Singapore During the British Colonial Period Up to 1945; Assess the Impact of the Japanese Occupation on Examinations in Singapore; What was the Significance of the School Certificate Examination Held in the Sime Road Camp During the Japanese Occupation?; The Post-War Years (1946-1970s); Assess the Development of Education and Examinations From the End of the Japanese Occupation to the Attainment of Self-Government in Singapore; Why and How Effective Were the Measures Undertaken by the Singapore Government to Establish Central Control Over Education and Examinations in Singapore in the 1960s-1970s?; The 1961 Examination Boycott Illustrates the Challenges in Forging a National System of Examinations. Do You Agree?; Charting Our Own Destiny (1980s-2007): How Effective had the Goh Keng Swee's Reforms in Education and Examination Been in Improving Singapore's Education System?; Examine the Key Policy Changes in Singapore's Education and Examinations in Response to the Challenges of a Rapidly Changing and Globalising world; OCyChange is More Important than Continuity in Education and ExaminationsOCO Discuss. Readership: Academics and professionals in education and assessment; general readership."

[A Hand Book on UNIVERSITY SYSTEM](#) Dec 01 2019 The objective of this handbook is to provide all information for academic administrators and all other participants like students, parents, academicians, government agencies, industries dealing with university. This book is an attempt to give an overall picture of Universities of higher learning describing their mode of functioning, infrastructure necessary and usefulness to the society and interests of various stakeholders. The cost of higher education during last decade in a few countries is tabulated helping the student in their choice. This book also outlines the administrative structure, responsibility infrastructure, process and functions of the University system. It also elucidates checks and balances that are to be in place. With newly given insight, an academic administrator will be better equipped to arrive at innovative solutions, optimize cost, improve reliability, simultaneously concentrating on the delivery of quality education of very high order.

Sessional Papers - Legislature of the Province of Ontario Jan 02 2020

Secondary School External Examination Systems Dec 25 2021 Summative assessment has been a contentious issue in educational circles for several decades, particularly high-stakes assessment events which arise at various junctures of the school cycle, especially those at the end of it. The French Baccalaureat and English A-Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives, as their outcomes are principal determinants of young people's future prospects. These examinations are external—they are devised, conducted and processed by agencies outside the schools, usually ministerial examination units. As such, they act as 'blind' arbiters of student achievement, providing the proverbial 'level playing field' which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear, examinations acted as filters, regulating the progression of pupils to subsequent tiers of formal education. Exit points occurred from primary school level up, from where unsuccessful candidates could enter the labour force and/or embark on occupationally specific further education and training. With the modernisation of the labour market and an ever-higher social demand for access to higher levels of formal education, the filtering function of examinations at lower levels of schooling has been gradually eroded, while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems (including the modification and, in some instances, abandonment of external examinations). This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling. Following an introduction by Stephen P. Heyneman of World Bank repute, there are sixteen chapters presenting Country Case Studies, which have been written up under common subheadings, thereby highlighting the comparative nature of the work and facilitating cross-referencing. The subsequent four chapters elaborate on the theme of 'external examinations beyond national borders', including a contribution by the International Baccalaureate Organisation. A defining feature of the work is the attention it pays to what it calls the 'nuts and bolts' of external examinations, from question-setting to grading procedures. These are, it is argued, instrumental in nurturing and maintaining public confidence in external examinations. The book will be of immense value to people involved in educational policy studies, especially strategic educational planning, as well as those directly concerned with formal assessment. The work has been written to appeal to a wide audience of informed persons—it is accessible to teachers and interested laypeople, as well as to academics."

Study! Jul 20 2021 Whether entering higher education straight from school, or returning to study later in life, students need to develop effective study skills to get the most out of a course. Whatever the subject, this book will help to achieve the aims of the student by offering practical advice and useful techniques for successful study. These skills are not always taught as part of courses because of time restriction, but with an increased performance emphasis for lecturers they are vital to the success of the course. In addition to this with more and more people returning to education and undergoing Continuing Professional Development the audience for this book is growing rapidly. The book covers three main areas: * accepting responsibility for learning: personal well-being, avoiding stress and organising time * student centred learning: developing the ability to learn and communicate through thinking, listening, observing, writing and talking * revision and examination techniques: approaching examinations with confidence. With additional help of choosing the right course and a new section on computer skills, Study! will be a valuable addition to the bookshelf of any student.
