[The Impact of the Credit Crunch on Small Business](#) May 17 2021  
**Banker's Guide to New Small Business Finance, + Website** Nov 10 2020 Detailed, actionable guidance for expanding your

revenue in the face of a new virtual market Written by industry authority Charles H. Green, *Banker's Guide to New Small Business Finance* explains how a financial bust from one perfect storm—the real estate bubble and the liquidity collapse in capital markets—is leading to a boom in the market for innovative lenders that advance funds to small business owners for growth. In the book, Green skillfully reveals how the early lending pioneers capitalized on this emerging market, along with advancements in technology, to reshape small company funding. Through a discussion of the developing field of crowdfunding and the cottage industry that is quickly rising around the ability to sell business equity via the Internet, *Banker's Guide to New Small Business Finance* covers how small businesses are funded; capital market disruptions; the paradigm shift created by Google, Amazon, and Facebook; private equity in search of ROI; lenders, funders, and places to find money; digital lenders; non-traditional funding; digital capital brokers; and much more. Covers distinctive ideas that are challenging bank domination of the small lending marketplace Provides insight into how each lender works, as well as their application grid, pricing model, and management outlook Offers suggestions on how to engage or compete with each entity, as well as contact information to call them directly Includes a companion website with online tools and supplemental materials to enhance key concepts discussed in the book If you're a small

business financing professional, Banker's Guide to New Small Business Finance gives you authoritative advice on everything you need to adapt and thrive in this rapidly growing business environment.

**Assessing Literacy in a Digital World** Oct 02 2022 This book illustrates the latest developments in literacy and language assessment in the digital context, and subsequently presents a rigorous validation study on a newly proposed form of assessment (scenario-based assessment, SBA) that seeks to respond to the contextual change of literacy activities. It combines theories and innovative practices in both the literacy and language assessment sectors. The empirical validation study on SBA, presented here, can help readers understand how digital scenarios can be realized in assessment practices with the aid of computer technology, and how the scenario settings in the digital context can affect EFL learners' reading-to-writing performance. In this way, it can facilitate the reconceptualization of L2 literacy in the digital context. Moreover, the evidence and critical examination presented here can offer readers more comprehensive insights into the value or validity of a given innovative approach before it is adopted in their contexts.

**What Elephants Know** Jul 27 2019

Abandoned in the jungle of the Nepalese Borderlands, two-year-old Nandu is found living under the protective watch of a pack of wild dogs. From his mysterious beginnings, fate delivers him to the King's elephant stable,

where he is raised by unlikely parents-the wise head of the stable, Subba-sahib, and Devi Kali, a fierce and affectionate female elephant. When the king's government threatens to close the stable, Nandu, now twelve, searches for a way to save his family and community. A risky plan could be the answer. But to succeed, they'll need a great tusker. The future is in Nandu's hands as he sets out to find a bull elephant and bring him back to the Borderlands. In simple poetic prose, author Eric Dinerstein brings to life Nepal's breathtaking jungle wildlife and rural culture, as seen through the eyes of a young outcast, struggling to find his place in the world.

**Literacy Beyond Text Comprehension** Jun 05 2020

*Literacy Beyond Text Comprehension* aims to systematically investigate how readers interpret reading tasks within a situation, and how that interpretation influences reading behavior and comprehension. Presenting a new model of REading as problem SOLVing (RESOLV), the authors describe reading comprehension in terms of how a reader adopts goals within a particular situation that then guide what is read, when, and how. By applying the RESOLV model to a range of reading situations, this book provides evidence to suggest that there is no unitary understanding of a task, because individuals bring their own goals and characteristics to the situation; as such, it demonstrates the importance of

understanding how a reader (e.g., student, test-taker, employee completing a work task) represents the context and the specific assignment. Written by internationally recognized learning sciences scholars, *Literacy Beyond Text Comprehension* advances the state of the art in reading research, but also seeks to inform a broader range of audiences, including those interested in the teaching and the assessment of reading.

*The Elgar Guide to Tax Systems* Dec 24 2021

"Tax systems have changed considerably in the past three decades. These fundamental changes have been the result of economic globalization, new political stances, and also of developments in public finance thought. The chapters in this volume offer a critical review of those changes from the perspectives of tax theory, policy and tax administration practice, and the political economy of taxation. The authors also consider what sort of reforms are worth undertaking in tax policy design, tax administration and enforcement, and the assignment of sub-national taxes. The authors in this volume are among the top scholars in the study of public finance. The development of tax systems in OECD countries is examined, as are various methods of taxation (direct versus indirect,

corporate income tax, value added tax and others) employed throughout the world. The politics of public finance and the institutions used to administer it are also analyzed. Reflecting on the influence of the research itself, Richard Bird closes the book with a chapter exploring whether or not economic literature has focused on the issues and problems that really matter to policymakers and whether it has influenced the development of tax systems."--Publisher's website.
