*American Bureaucracy Apr 14 2021 Like it or not, contemporary man is man-in-bureaucracy. He spends the majority of his waking hours in a bureaucracy; es-tablishes an identity and status in a bureaucracy; garners most of his satis-factions and disappointments in a bu-reaucracy; and, increasingly, he is what he does. Aside from the importance of understand-ing those institutions that shape our values, behavior, and experience, bu-reaucracy is a vital area for study because it reveals a wide range of social behavior in a compact and comprehensible way. The abstract and ephemeral problems of society at large are brought down to earth made measurable, comprehensible and visible in the bureaucratic microcosm. Problems of power and influence, change and innovation, intergroup conflict, ambition and aspiration, self-realization versus participative democracy, technology versus humanism: all can be observed and analyzed in human organizations. This volume pinpoints the dilemma of present bureaucratic organizations: the conflict between the need to sustain innovation and bureaucratic drives toward rationality and stability. The essays it contains discuss specific human needs that bureaucracy must meet if it is to continue to attract talented people and takes a step into the future to analyze the kinds of organizations that may be expected to evolve as institutions seek more flexible use of human resources.*

Finally, Part IV addresses the concept of values and goals as key factors in determining the success of a change effort.*

*Managing People Is Like Herding Cats Mar 26 2022 Cats of course, won't be herded. And the most successful organizations in the 21st Century won't be managed -- they'll be led. The answer to America's current leadership crisis is leaders (not managers) who recognize that "the only*

capital that really counts is human capital" And whether readers are looking for a leader or looking to be a better one, Warren knows what it takes. In answer to the leadership crisis, Bennis offers insight into developing leaders and their competencies, by explaining ten traits of dynamic leaders, and how these leaders constantly reinvent themselves. *Judgment* Jan 24 2022 "With good judgment, little else matters. Without it, nothing else matters." Whether we're talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader's judgment determines the fate of the entire organization. That's why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a powerful framework for making tough calls when the stakes are high and the right path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life with interviews with world-class leaders who have thrived or suffered because of their judgment calls. These stories include: • Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world's premier technology growth company. • Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system. • Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect. • The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega. • A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company. • Brad Anderson, CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it. Whether you're running a small department or a global corporation, *Judgment* will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can afford to neglect this crucial discipline—and no previous book has ever brought it into such clear focus.
