The Scientist's Guide to Writing May 05 2020 A concise and accessible primer on the scientific writer's craft The ability to write clearly is critical to any scientific career. **The Scientist's Guide to Writing** provides practical advice to help scientists become more effective writers so that their ideas have the greatest possible impact. Drawing on his own experience as a scientist, graduate adviser, and editor, Stephen Heard emphasizes that the goal of all scientific writing should be absolute clarity; that good writing takes deliberate practice; and that what many scientists need are not long lists of prescriptive rules but rather direct engagement with their behaviors and attitudes when they write. Simple But Not Easy, 2nd Edition Apr 03 2020 Described by the author as “a slightly autobiographical and heavily biased book about investing”, *Simple But Not Easy* won fans among both professional and private investors alike when first released in 2007. The theme of the book is that investment is simpler than non-professionals think it is, in that the rudiments can be expressed in ordinary English and picked up by anybody. It is not a science. But investment is also difficult. People on the outside tend to think that anyone on the inside should be able to do better than the market indices. This is not so. Picking the managers who are likely to do better is a challenge. Richard Oldfield begins with a detailed confession of some of his worst mistakes and what they have taught him. He discusses the different types of investment, why fees matter, and the importance of measuring performance properly. He also outlines what to look for (and what not to look for) in an investment manager, when to fire a manager, and how to be a successful client. A cult classic for its candid confessions and sparkling wit, this extended edition of *Simple But Not Easy* – featuring a new author’s preface and a substantial afterword – remains an indispensable companion for all those interested in the rewarding but enigmatic pursuit of investing.
