Long May She Wave Nov 02 2022 From one of the world's leading graphic designers comes a stunning tribute to America's most enduring icon—the Stars and Stripes. The Revolutionary Congress resolved in 1777 that "the flag of the United States be 13 stripes, alternate red and white, that the Union be 13 white stars in a blue field representing a new constellation." Since that time, the American flag has been raised high in wartime triumph and peacetime celebration; burned in fervent protest; sewn lovingly onto quilts, caps, pillows, and bags; appropriated by the commercial sphere to sell goods as varied as cigars, and designer clothing, and rock-and-roll albums; and faithfully honored every 4th of July to celebrate America's independence. This collection of more than 3,000 Stars and Stripes artifacts ranges from Civil War-era banners and Native American braided moccasins to an early 20th-century "friendship" kimono and original flag art by several of the world's leading designers. In its deluxe format with over 500 illustrations, LONG MAY SHE WAVE gives wide berth to the flag in all its manifestations, and the result is a stunning visual history of America's most treasured symbol. Full-color throughout, with over 500 illustrations in deluxe 11 x 14-inch volume—LONG MAY SHE WAVE is the perfect gift for folk-art appreciators, history buffs, and collectors. Features the 3,000-piece exhibit that was displayed at the American Institute of Graphic Arts and the San Jose Museum of Art in 2000. From toy soldiers to collectable spoons, cigar blankets to historic flags—the breadth of the collection unrivaled. For a list of appearances by this author, check out our Calendar of Events.

Sappi Tree Spotting Oct 01 2022 Sappi tree spotting is the well-known, easy method of tree identification, written for the newcomer to the area as well as the experienced tree enthusiast. Sappi Tree Spotting: Lowveld (including the Kruger National Park) is now in its third edition, and it will help the reader to recognize almost three quarters of the larger trees to be seen in the Lowveld. The title is based on three innovative concepts - it keeps the terminology simple. The average recreational tree spotter will never use 'pubescent' when 'hairy' will do Most trees are easy to find, as long as you look for the right trees in the right places. Some trees can be identified easily because of their Striking Features. These trees do not need a complex system of 'keying', because they are instantly recognisable.

Mergers and Merger Remedies in the EU Aug 07 2020 . . . for practitioners considering whether to use economists to evaluate merger proposals, this book provides a relevant insight into the types of information that would be necessary to develop even a basic simulation model, and some guidance as to circumstances where such technique may be appropriate. Vanessa Holliday, Competition and Consumer Law Journal . . . highly recommended for practitioners as well as academics interested in merger remedies. Arndt Christiansen, European Competition Law Review Headlines are made when the European Commission prohibits a merger, but this is actually very rare. Clearances subject to conditions (i.e. remedies) happen ten times as frequently, but have received far less attention in academic literature. This book provides an empirical assessment of the effectiveness of merger remedies, employing a novel simulation methodology based on formal economic theory. The authors were given unprecedented access to data available to case handlers, concerning a range of remedied mergers covering 21 markets. Using this they have adapted simple simulation techniques to appraise the competitive effects of these mergers and the impact of potential and actual remedies. Ex-ante results are then compared with ex-post impact to examine the actual effectiveness of remedies. The results provide a critique of both simple market share analysis and remedy design. This research thus contributes to economics research and practical merger policy. This rare empirical assessment of the efficacy of remedies in competition policy will be of great significance and interest to policy makers, as well as to economists, lawyers, practitioners and students in competition law.

Cellulose Derivatives Dec 31 2019 This book summarizes recent progress in cellulose chemistry. The last 10 years have witnessed important developments, because sustainability is a major concern. Biodegradable cellulose derivatives, in particular esters and ethers, are employed on a large scale. The recent developments in cellulose chemistry include unconventional methods for the synthesis of derivatives, introduction of novel solvents, e.g. ionic liquids, novel approaches to regioselective derivatization of cellulose, preparation of nano-particles and nano-composites for specific applications. These new developments are discussed comprehensively. This book is aimed at researchers and professionals working on cellulose and its derivatives. It fills an important gap in teaching, because most organic chemistry textbooks concentrate on the relatively simple chemistry of mono- and disaccharides. The chemistry and, more importantly, the applications of cellulose are only concisely mentioned.

Disgrace Oct 21 2021 J.M. Coetzee's latest novel, *The Schooldays of Jesus*, is now available from Viking. *Late Essays: 2006-2016* will be available January 2018. Set in post-apartheid South Africa, J. M. Coetzee's searing novel tells the story of David Lurie, a twice divorced, 52-year-old professor of communications and Romantic Poetry at Cape Technical University. Lurie believes he has created a comfortable, if somewhat passionless, life for himself. He lives within his financial and emotional means. Though his position at the university has been reduced, he teaches his classes dutifully; and while age has diminished his attractiveness, weekly visits to a prostitute satisfy his sexual needs. He considers himself happy. But when Lurie seduces one of his students, he sets in motion a chain of events that will shatter his complacency and leave him utterly disgraced. Lurie pursues his relationship with the young Melanie—whom he describes as having hips “as slim as a twelve-year-old’s”—obsessively and narcissistically, ignoring, on one occasion, her wish not to have sex. When Melanie and her father lodge a complaint against him, Lurie is brought before an academic committee where he admits he is guilty of all the charges but refuses to express any repentance for his acts. In the furor of the scandal, jeered at by students, threatened by Melanie's boyfriend, ridiculed by his ex-wife, Lurie is forced to resign and flees Cape Town for his daughter Lucy's smallholding in the country. There he struggles to rekindle his relationship with Lucy and to understand the changing relations of blacks and whites in the new South Africa. But when three black strangers appear at their house asking to make a phone call, a harrowing afternoon of violence follows which leaves both of them badly shaken and further estranged from one another. After a brief return to Cape Town, where Lurie discovers his home has also been vandalized, he decides to stay on with his daughter, who is pregnant with the child of one of her attackers. Now thoroughly humiliated, Lurie devotes himself to volunteering at the animal clinic, where he helps put down diseased and unwanted dogs. It is here, Coetzee seems to suggest, that Lurie gains a redeeming sense of compassion absent from his life up to this point. Written with the austere clarity that has made J. M. Coetzee the winner of two Booker Prizes, *Disgrace* explores the downfall of one man and dramatizes, with unforgettable, at times almost unbearable, vividness the plight of a country caught in the chaotic aftermath of centuries of racial oppression.

Save Mozambique's Elephant Coast Dec 23 2021 The author meets entrepreneur Jim on a 1988 North Pole adventure, discover they are both Africa enthusiasts. Returning from a waspish over the Andes pipeline experience in 1995, Jim recruits him for Africa to produce a feasibility study to obtain a 40,000 acre Indian Ocean look-alike San Francisco Peninsula development offered personally by Mozambique's President. The project goes through several near death experiences, end up an inimitable world class international tourist destination project. Jim has the largest wildlife refuge development by private enterprise on record, a 914 Sq Mi wildlife ecotourism development which safeguards the UN's botanically diverse region. But Jim fails to develop it, dies in 1999. The author now targets recruiting a billionaire or Disney to fund expanding to 4000 Sq Mi to connect to the nearby 38,500 Sq Mi worlds' largest wildlife refuge, to provide range to save 5000 Kruger elephants slated for mercy killing for overgrazing.

Understanding Italian Opera Jan 12 2021 Opera is often regarded as the pinnacle of high art. A "Western" genre with global reach, it is where music and drama come together in unique ways, supported by stellar singers and spectacular scenic effects. Yet it is also patently absurd -- why should anyone break into song on the dramatic stage? -- and shrouded in mystique. In this engaging and entertaining guide, renowned music scholar Tim Carter unravels its many layers to offer a thorough introduction to Italian opera from the seventeenth to the early twentieth centuries. Eschewing the technical musical detail that all too often dominates writing on opera, Carter begins instead where the composers themselves did: with the text. Walking readers through the relationship between music and poetry that lies at the heart of any opera, Carter then offers explorations of five of the most enduring and emblematic Italian operas: Monteverdi's *The Coronation of Poppea*; Handel's *Julius Caesar in Egypt*; Mozart's *The Marriage of Figaro*; Verdi's *Rigoletto*; and Puccini's *La Bohème*. Shedding light on the creative collusions and collisions involved in bringing opera to the stage, the various, and varying, demands of the text and music, and the nature of musical drama, Carter also shows how Italian opera has developed over the course of music history. Complete with synopses, cast lists, and suggested further reading for each work discussed, *Understanding Italian Opera* is a must-read for anyone with an interest in and love for this glorious art.

Wildland Fire Management Handbook for Sub-Saharan Africa Dec 11 2020 Africa is a fire continent. Since the early evolution of humanity, fire has been harnessed as a land-use tool. Many ecosystems of Sub-Saharan Africa that have been shaped by fire over millennia provide a high carrying capacity for human populations.

Independent Power Projects in Sub-Saharan Africa May 04 2020 Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in Sub-Saharan Africa. Simply put, Africa does not have enough power. Despite the abundant low-carbon and low-cost energy resources available to Sub-Saharan Africa, the region's entire installed electricity capacity, at a little over 80 GW, is equivalent to that of the Republic of Korea. Looking ahead, Sub-Saharan Africa will need to ramp-up its power generation capacity substantially. The investment needed to meet this goal largely exceeds African countries already stretched public finances. Increasing private investment is critical to help expand and improve electricity supply. Historically, most private sector finance has been channeled through privately financed independent power projects (IPP), supported by nonrecourse or limited recourse loans, with long-term power purchase agreements with state utility or another off-taker. Between 1990 and 2014, IPPs have spread across Sub-Saharan Africa and are now present in 17 countries. Currently, there are 125 IPPs, with an overall installed capacity of 10.7 GW and investments of \$24.6 billion. However, private investment could be much greater and less concentrated. South Africa alone accounts for 67 IPPs, 4.3 GW of capacity and \$14.4 billion of investments; the remaining projects are concentrated in a handful of countries. The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment. At the core of this analysis is a reflection on whether IPPs have in fact benefited Sub-Saharan Africa, and how they might be improved. The analysis is based primarily on in-depth case studies, carried out in five countries, including Kenya, Nigeria, South Africa, Tanzania and Uganda, which not only have the most numerous but also among the most extensive experience with IPPs.

The Best of Cover Design May 28 2022 You can't judge a book by its cover, or so the saying goes. We beg to differ. Each of us is exposed to several thousand messages a day. To be successful, covers not only have to stand out amongst all the clutter, but they also need to make an instant connection with viewers. Designing covers isn't an easy task. It's a minefield of requirements, constraints, and subjective opinions, oftentimes resulting in what we like to call the "design-by-committee of despair." Make the logo bigger. The CEO's daughter doesn't like orange; change it. The sales team begins art directing. Welcome to the land of mediocrity. We've all been there, and it requires ninja-like skills to traverse and emerge in one piece. Despite the challenges, some covers clearly rise to the top. You can't help but pick up the magazine, open the brochure, or buy the book. They draw you in through their cleverness, simplicity, or boldness. These are the covers contained herein. Of the more than 2,000 covers received, the authors had the dubious task of selecting about 350 to be featured in The Best of Cover Design. The chosen covers were selected based on their initial visual impact and effectiveness in conveying the message within. It is an inspiration feast for the eyes.

Allowed to Grow Old Jun 24 2019 There's nothing quite like a relationship with an aged pet—a dog or cat who has been at our side for years, forming an ineffable bond. Pampered pets, however, are a rarity among animals who have been domesticated. Farm animals, for example, are usually slaughtered before their first birthday. We never stop to think about it, but the typical images we see of cows, chickens, pigs, and the like are of young animals. What would we see if they were allowed to grow old? Isa Leshko shows us, brilliantly, with this collection of portraits. To create these portraits, she spent hours with her subjects, gaining their trust and putting them at ease. The resulting images reveal the unique personality of each animal. It's impossible to look away from the animals in these images as they unforgettably meet our gaze, simultaneously calm and challenging. In these photographs we see the cumulative effects of the hardships of industrialized farm life, but also the healing that time can bring, and the dignity that can emerge when farm animals are allowed to age on their own terms. Each portrait is accompanied by a brief biographical note about its subject, and the book is rounded out with essays that explore the history of animal photography, the place of beauty in activist art, and much more. Open this book to any page. Meet Teresa, a thirteen-year-old Yorkshire Pig, or Melvin, an eleven-year-old Angora Goat, or Tom, a seven-year-old Broad Breasted White Turkey. You'll never forget them.

Multinational Enterprises and the Global Economy July 26 2019 For many years to come this volume... is surely going to be the ultimate reference work on international business... thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, *International Business Review* Multinational Enterprises and the Global Economy has become a classic in international business... Yet, the book's second edition is even better than the first, in part because of Professor Dunning's wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour... In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship it has developed over the past 50 years. Alain Verbeke, *Journal of International Business Studies* The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. *Journal of International Business Studies* This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were

reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is presented.

Red Jacket Nov 21 2021 2015 Rogers Writers' Trust Fiction Prize 2015 — Short-listed As she comes into adulthood, Grace confronts the mystery of her own identity and the story of her birth mother in this sprawling, large-hearted novel. Growing on the Caribbean island of St. Chris, Grace Carpenter never feels like she really belongs. Although her large, extended family is black, she is a redibo. Her skin is copper-coloured, her hair is red, and her eyes are grey. A neighbour taunts her, calling her "a little red jacket," but the reason for the insult is never explained. Only much later does Grace learn the story of her birth mother and decipher the mystery surrounding her true identity. "A compelling tale of faith and family, ranging from the dusty landscapes of West Africa to the rich flavours of the Caribbean." — WILL FERGUSON, Giller Prize-winning author of *419*

How to Build an Android Mar 26 2022 The stranger-than-fiction story of the ingenious creation and loss of an artificially intelligent android of science-fiction writer Philip K. Dick In late January 2006, a young robotacist on the way to Google headquarters lost an overnight bag on a flight somewhere between Dallas and Las Vegas. In it was a fully functional head of the android replica of Philip K. Dick, cult science-fiction writer and counterculture guru. It has never been recovered. In a story that echoes some of the most paranoid fantasies of a Dick novel, readers get a fascinating inside look at the scientists and technology that made this amazing android possible. The author, who was a fellow researcher at the University of Memphis Institute of Intelligent Systems while the android was being built, introduces readers to the cutting-edge technology in robotics, artificial intelligence, and sculpture that came together in this remarkable machine and captured the imagination of scientists, artists, and science-fiction fans alike. And there are great stories about Dick himself—his inspired yet deeply pessimistic worldview, his bizarre lifestyle, and his enduring creative legacy. In the tradition of popular science classics like *Packing for Mars* and *The Disappearing Spoon*, *How to Build an Android* is entertaining and informative—popular science at its best.
